To attend the public opening procedures, it is necessary to comply with the access control regime. To order a pass, call the contact phone number of the Contest Organizer. To confirm the rights of presence at the procedures of opening the envelopes of the representatives of the Contest Participants, it is necessary to have a power of attorney confirming their rightfulness and the dignity of the interests of the Contest Participants.
 - 3.12.3. During the course of these procedures, the Competition Committee includes each received envelope and offers the following information on the quality of the application materials for participation in the competition:
 - name and address of the competition participant;
 - availability of documents and documents stipulated by the tender documentation;
 - Conditions for the execution of the contract, the response to such an application and important criteria for evaluating applications for participation in the competition.
 - 3.12.4. The competition organizer may review the audio recording procedures for opening the received envelopes.
 - 3.12.5. If, within the time period established by this document, not a single envelope with an application for participation in the competition is received, this fact is recorded in the minutes of the meeting of the competition committee and the competition is declared invalid.
 - 3.12.6. During the opening procedure, the Competition Committee maintains a Protocol on the opening of envelopes with applications for participation in the competition, which reflects all

the information announced by the Competition Committee.

- 3.12.7. The protocol for opening envelopes with applications for participation in the competition is posted on the website within 3 (three) days after signing.

3.13. Late applications for participation in the competition

- 3.13.1. After the deadline for submitting applications for participation in the competition, Applicants for participation in the competition will not be able to submit an application for participation in the competition.

3.14. Review and evaluation of applications for participation in the competition, selection of the competition winner

3.14.1. General Provisions

- 3.14.1.1. The consideration and evaluation of applications received for participation in the competition shall be carried out within the timeframes established in paragraph 12 of the notification.

- 3.14.1.2. When reviewing and evaluating applications for participation in the competition, the Competition Committee shall also involve persons (experts and specialists) who are not involved in participation in the competition, in order to conduct examinations of applications for participation in the competition, but in any case, access to the dynamics of the dynamics in the competition and the determination of the numbers of applications for participation in the competition for summing up the ranking shall be carried out by the Competition Committee.

- 3.14.1.3. The participants of the competition do not determine in any way to influence, participate or reduce in the consideration and evaluation of applications for participation in the competition, as well as to enter into contacts with persons performing the examination of applications for participation in the competition. Any conditions for the participation of the Participants of the competition are carried out by the Competition Commission during the examination of competitive applications for participation in the competition or upon conclusion of contracts, and also put pressure on any person involved by the Organizer of the competition in the case of work in the competition, if the data are confirmed by documents, requirements for restrictions for the requirements for participation in the competition of such Participants of the competition.

- 3.14.1.4. During the review and evaluation of applications for participation in the competition, the Competition Organizer has the right to request from the relevant government authorities, as well as individuals and natural persons specified in the application for participation in the competition and appendices thereto, information in accordance with the reliability indicated in the application for participation in the competition.

- 3.14.1.5. If there are any doubts about the authenticity of the copy, the Competition Organizer has made a request to review the original document provided in the copy. If the Competition participant does not use the original document within the time period specified in the request, the copy of the document is not found and the document is considered not provided.

- 3.14.1.6. The review and evaluation of applications for participation in the competition includes a selection and evaluation stage.

3.14.2. Selection stage

- 3.14.2.1. The tender committee, within the period specified in **the notice** , shall limit applications for participation in the tender and tender participants for their compliance with the requirements established by the obligations of the Kyrgyz Republic and this tender documentation, and shall determine for the participants procurement procedures that allow for the dynamics of development in the tender.

- 3.14.2.2. As part of the selection stage, the Competition Committee yesterday:

- compliance of applications for participation in the competition meets these requirements
tender documentation;
- compliance of the Participants of the competition with the requirements of this competition
documentation;
- compliance of commercial and technical proposals with requirements

this tender documentation.

- 3.14.2.3. The application for participation in the competition must fully comply with all the requirements for the competition documentation or, better yet, meet these threshold requirements. The competition committee expects to reject participants from further participation in the competition in the following cases:
- failure to submit the required documents, in accordance with this tender documentation, or in such documents, or in such documents false information about the Tender Participant, including invited subcontractors/co-executors (if involved) or about the proposed work;
 - non-compliance of the Tender Participant, including the subcontractors/co-executors involved (if involved), with the requirements established in this tender documentation;
 - non-compliance of the application for participation in the competition with the requirements of this competition documentation.
- 3.14.2.4. If there are discrepancies between the designation of the sum of words and the competition committee will begin its consideration of the figures later, the specified phrase.
- 3.14.2.5. In the event that the Royal Competition Committee is found to be untrustworthy,
- contained in the documents submitted by the Participant of the competition, the fact of liquidation of the Participant of the competition - a legal entity or bankruptcy proceedings against the Participant of the competition - a legal entity, individual entrepreneur, or the fact of liability for its activities in the manner prescribed for the state in the state in, as well as if the Participant of the competition has arrears in accrued fees, collected and other payments to budgets of any level or individual extra-budgetary funds for the past calendar year, which calculates) the percentage book value of assets
- participant, the Competition Committee shall disqualify such participant from participating in the competition at any level of his region.
- 3.14.2.6. Based on the results of the selection stage of consideration and evaluation of applications for participation in the competition, the Competition Committee makes a decision on admission to the prospect of dynamics in the competition or on refusal to admit to dynamics in the competition, and also draws up a Protocol on the revision of applications for participation in the competition. The specified protocol for 3 (three) days following the day of signing the protocol is posted on the website specified in paragraph 3.1.1.
- 3.14.2.7. If, based on the results of the selection stage, the application for participation in the competition is reviewed and evaluated and a decision is made to refuse admission to continued development in the competition of all Participants of the competition who submitted applications for participation in the competition, or to admit to continued participation in the competition only one party of the competition who submitted an application for participation in the competition, the competition is declared invalid.
- 3.14.3. Evaluation stage
- 3.14.3.1. During the evaluation stage, the Tender Committee evaluates and compares applications for participation in the tender and ranks them according to their degree of reliability for the Customer.
- 3.14.4. Procedure for evaluation and consideration of applications for participation in the competition
- 3.14.4.1. Evaluation and preparation of applications for participation in the competition by the Competition Committee in order to determine the main terms of the contract.
- 3.14.4.2. Based on the results of the evaluation of applications for participation in the competition by the Competition Committee, each application for participation in the competition, according to the least degree of advantage of the terms of execution of the contract of the competition contained therein, corresponds to a serial number. The first number is the application for participation in the competition, in which the best options for the terms of execution of the contract are proposed.
- 3.14.5. Summing up the results of the competition. Determining the winner of the competition

- 3.14.5.1. Based on the results of the evaluation of applications for participation in the competition submitted by the competition participants, if the competition is recognized as successful, the Competition Committee determines the Winner of the competition.
- 3.14.5.2. The winner of the competition is the participant who proposed the best combination of terms for the execution of the contract and the application for participation in the competition, which was assigned the first number.
- 3.14.5.3. Based on the results of the competition, a protocol is drawn up for selecting the winner, including information about the place, date, time of the evaluations and applications for participation in the competition, in the competitions of participants, applications for participation in the competition that were considered, about opinions and for participation in the competition, about the adoption of decisions with respect to the participants of the competition with their justification, about the winner of the competition, about the participants of the vote, the application for participation in the competition, those who took second place, their names for persons, persons, first name, patronymic (for individuals), postal address.
- 3.14.5.4. The protocol for selecting the Winner shall be posted on the website and in the media specified in subparagraph 3.1.1. within 5 (five) days from the date of signing of this protocol.

3.14.5.5. Any participant in the competition, after the Protocol for the selection of the Winner of the competition has been posted, must send a written request to the Organizer of the competition to announce the results of the competition. The Organizer of the competition must, within 3 (three) working days from the date of receipt of such a request, submit a corresponding written application to the participant in the competition.

3.15. Signing of the protocol on the safety of the open tender and conclusion of the EPC - contract with the winner of the competition

- 3.15.1. The organizer of the competition within 3 (three) working days from the date of signing the Protocol on the selection of the Winner of the competition transfers to the Winner of the competition the Protocol on the protection of the open competition. The winner of the competition is obliged to provide the organizer of the competition with the signed and certified seal from his side of the Protocol on the security of the open competition within 10 (ten) days from the date of indicating the protocol.
- 3.15.2. The contract with the winner of the competition will be concluded for the period specified in the constituent notice 14.
- 3.15.3. In cases where the Winner of the competition withdraws from concluding an agreement under the terms of this competition documentation, the Customer shall draw up an agreement with the Participant of the competition, whose application for participation in the competition shall assign a second number, recording this circumstance in the relevant protocol.
- 3.15.4. In the event of a refusal by a Participant of the competition, an application for participation in the competition, to which the second number has been assigned, to conclude a contract, the Customer shall decide to declare the competition invalid.
- 3.15.5. In the event that the Winner of the competition, or the Participant of the competition, an application for participation in the competition with the assignment of the second number, or the Participant, which is EPC - the contract in accordance with clause 3.15, within the time period stipulated by the tender documentation, the signed contract not provided by the Customer, the Winner of the tender or the Participant of the tender, the application for participation in the tender, which is assigned the second number, or the Participant with whom the contract is concluded, is recognized as having evaded the conclusion of the contract.

An application that is firm (fixed) and includes accounting and other financial risks for the entire period of execution of the contract. The price adjustment by the contract in connection with inflation and changes in the exchange rate during the term of the contract is not made.

7.8.3. The participant of the competition must indicate prices for all work performed, I suggest submitting an application for participation in the competition. If the Participant of the competition does not indicate the cost of the work on the offer to perform the work, the Customer will not pay him the cost and will consider them included in the price agreement.

7.8.4. The price is maximum and can be reduced.

7.8.5. An applicant for participation in the competition when preparing an application for participation in the competition

All risks associated with increasing the contract price should be taken into account independently. The Customer does not consider the issue of increasing the contract price based on the results of design and survey work, unless this is expressly provided for by the requirements of the Kyrgyz Republic.

7.8.6. In case of non-compliance of the Participant's application with the conditions of this subdivision

The competition organizer may reject his application to participate in the competition.

7.9. Involvement of subcontractors/co-executors

7.9.1. The tender documentation provides for the possibility of engaging subcontractors/co-performers. The tender participant must include in their application for participation in the tender all the works that they take into account under subcontracts, indicating the percentage of the subcontract (sub-contract) to the volume of work, and provide detailed information about their subcontractors/co-performers that they plan to hire to perform the contract. The tender participant must submit letters from subcontractors/co-performers to the Organizer of the tender as part of their application for participation in the tender, in turn, the subcontractor/co-performer informs that the tender participant is working, in the event that

their tender participant is recognized as the winner, they are ready to ensure the performance of the works specified in the application for participation in tenders and in the future, subject to a future agreement between the tender participant and the subcontractor/co-performer of the agreements.

7.9.2. If the volume of the subcontract is 10 (ten) percent of the contract price, the participant in the tender must submit documents as part of its application for participation in the tender confirming the compliance of the proposed subcontractor/co-contractor with the requirements of 6.4. Provided to Participants of the tender in the part concerning the volume of work performed by this subcontractor/co-contractor.

7.9.3. When considering an application for participation in the competition, the commission has the right to reject the competition of any subcontractor/co-contractor proposed in the application for participation in the competition without explaining the reasons for such rejection. In the event of rejection of a subcontractor/co-contractor, the Participant of the competition, without changing the terms of the application for participation in his competition, must submit another for approval to the Organizer of the competition (Customer) subcontractor/co-executor providing the required services.

7.10. **Participation in the competition of collective participants**

7.10.1. If an application for participation in the competition is submitted by a collective participant, the following requirements must additionally be met.

7.10.2. Each organization that is part of the collective participant must comply with this tender documentation.

7.10.3. Organizations representing a collective composition enter into an agreement among themselves, containing the norms of the Civil Code of the Kyrgyz Republic, and meet the following requirements:

- a) in agreements it is necessary to clearly control the rights and obligations of the party both within the framework of participation in the competition and within the framework of the execution of the contract;
- б) the agreements must clearly define the nomenclature, volumes, cost and timing of deliveries between the participants of the collective participant;
- в) in the agreement there must be a specific leader who, in the long term, determines the interests of each of the organizations included in the collective participation, within the restrictions of the Competition Organizer and the Customer;
- г) the agreement must establish subsidiary liability of the organization for each organization for obligations, termination of participation in the competition, as well as joint and several liability for the timely and full execution of the agreement;
- д) The contract must stipulate that all operations for the execution of the contract as a whole, including payments, are carried out exclusively with the leader, however, at the request of the Customer or on his initiative, the effective scheme may be changed.

7.10.4. Any organization can only be a part of one collective participant and does not have the right to participate in the competition independently.

7.10.5. In connection with the above, the collective participant prepares an application for participation in the competition taking into account the following requirements:

- a) the application for participation in the competition includes information confirming the compliance of each member of the collective participant with the established requirements;
- б) an application for participation in the competition is prepared and submitted by the leader on his own behalf with a reference to the fact that he represents the interests of the collective participant;
- в) The application for participation additionally includes a notarized competitive copy of the agreement between the organizations that make up the collective

participant;

- г) An application for participation in an additional agreement must include information on the nomenclature of the competition, volumes, cost and terms of delivery between the participants of the collective participant.

7.10.6. When determining certain parameters of the association's activity, these parameters are summed up. The absence of summation of indicators must be present in at least one member of the association.

7.10.7. An application for participation in a competition submitted by a collective competition participant may be rejected if, during the competition, prior to signing the Protocol on the activities of the open competition, it becomes clear that one or more organizations from the collective participation, and the working organization, from the point of view of the Customer, does not have the opportunity to independently select a contract.

7.10.8. The customer has the right to unilaterally terminate the Protocol on Obligations of an open tender or contract if the collective participant includes one or more organizations.

IV. PRINTING HOUSES

8. STANDARD FORMS OF DOCUMENTS SUBMITTED AS PART OF THE APPLICATION FOR PARTICIPATION IN THE COMPETITION

- 8.1. **Standard forms of documents submitted as part of applications for participation in competition, are provided in Appendix No. 3 to this competition documentation and are its responsible part.**

Performed by Aliev I.E.0770083093
Mukhidin u. B. 0702382488

TECHNICAL PART

**Technical specifications for an open tender
the EPC legal opinion - turnkey construction contract using the FBOOT model Upper
Naryn cascade of 4 hydroelectric power plants
(Akbulunskaya HPP, Narynskaya HPP-1, Narynskaya HPP-2, Narynskaya HPP-3)**

TECHNICAL PART

Technical specifications for an open tender

the EPC legal opinion - turnkey construction contract using the FBOOT model Upper Naryn Cascade (Akbulunskaya HPP, Naryn HPP-1, Naryn HPP-2, Naryn HPP-3)

with division into:

Lot No. 1 for the turnkey construction of the Akbulunskaya hydroelectric power station

Lot No. 2 for the turnkey construction of Naryn HPP-1

Lot No. 3 for the turnkey construction of Naryn HPP-2

Lot No. 4 for turnkey construction of Naryn HPP-3.

To implement the projects, it is necessary to solve the following tasks:

1. Analysis and use of the Customer's documentation;
2. Development of working documentation for the construction of the Upper Naryn cascade of 4 hydroelectric power plants;
3. Use of financial models to attract investments by the Customer is carried out using the project financing method with the preparation of a PPP agreement with the following structure:
 - attracted in the form of a contribution from a private partner in the form of financial resources for investment - 100% of the total cost of the project is formed through a loan from an attracted private partner from an MFI.
4. Construction of the facility using the EPC method - contract (engineering , procurement, construction) according to FIDIC requirements:
 - engineering (engineering) - design and survey work and obtaining all ready permitting documentation.
 - supply (procurement) - purchase and delivery of materials and equipment for the project;

5. The cost of work under the EPC contract between JSC "Electric Stations" and the General Contractor is subject to adjustment in the event of changes in the technical specifications or in the additional terms of the transaction.
6. All conditions on restrictions between the Customer and the General Contractor, in accordance with the EPC principles. contract signed under the terms of a competitive bidding

Item No.	List of basic data and requirements	Basic data and requirements
1.	General information about the project	
1.1	Description of objects	Installed capacity (head + diversion hydroelectric power plants) - 237.7 MW including: Akbulunskaya hydroelectric power station – 87.4 MW; Naryn HPP-1 – 47.7 MW; Naryn HPP-2 – 47.6 MW; Naryn HPP-3 – 55.0 MW.
1.2	Customer	JSC "Electric Stations".
1.3	Name of the Contractor's organization	Determined based on the results of open international tenders (IIT).
1.4	Location of the site and arrangement of the terrace	Kyrgyz Republic, Naryn region, from the city of Naryn 40 km upstream of the Naryn river.
1.5	Basis for the implementation of the project	<ul style="list-style-type: none"> - National Development Program of the Kyrgyz Republic until 2026 Section 6.1. Hydropower, approved by the Decree of the President of the Kyrgyz Republic dated October 12, 2021 No. 435 - Loan agreement for the construction project of Akbulunskaya HPP, Narynskaya HPP-1, Narynskaya HPP-2, Narynskaya HPP-3, between the General Contractor and the IFI as a justification;
1.6	Type of construction	New.
1.7	Design stage	Conducting design and survey work with the preparation of design documentation at the design and RD stage) with the receipt of all necessary permits for the construction of the hydroelectric cascade.
1.8	Purpose of the work	Implementation of the Project “Construction and operation of the Upper Naryn cascade of hydroelectric power plants” Lot No. 1 Akbulunskaya hydroelectric power plant, city of Lot No. 2 Naryn HPP-1, Lot No. 3 Naryn HPP-2, Lot No. 4 Naryn HPP-3

1.9	Basic requirements determining the focus of design work	<p>1 Regulatory documents:</p> <ul style="list-style-type: none"> - regulating design and survey activities in the Kyrgyz Republic. - the latest standards IEC , EN , ISO , GOST, GOST R), DIN - FIDIC provisions (Structures and composition of the proforma for EPC contract) <p>2. Estimated start-up dates for hydroelectric power plants no later than (time after EPC conclusion contract):</p>
-----	---	--

		<ul style="list-style-type: none"> - Akbulunskaya hydroelectric power station - 3 quarters of the fifth year; - Narynskaya HPP-1 – 3 quarters of the fifth year - Narynskaya HPP-2 – 3 quarters of the sixth year - Narynskaya HPP-3 – 3 quarters of the sixth year
2.	Conditions for attracting investments and servicing the loan	
2.1 Financial conditions for attracting investments in a PPP project	<p>Employer (Customer) Guarantor</p> <p>General contractor for design, construction /Borrower.</p> <p>Contract amount.</p> <p>Construction period.</p> <p>Loan amount.</p> <p>Loan repayment period.</p> <p>Grace period. Duration period. Interest rate. Organizational fee.</p> <p>The term of the Concession Agreement for the commercial use of the hydroelectric power station for the purpose of return of investments</p> <p>Date of transfer of hydroelectric power plants to the ownership of JSC "Electric Stations"</p>	<p>JSC "Electric Stations" Ministry of Finance</p> <p>Winner of the competitive bidding</p> <p>When agreeing on the scope of work and the amount of the EPC contract after determining the winner of the private partner</p> <p>Up to 7 years</p> <p>Determined by the Borrower</p> <p>Up to 15 years</p> <p>5 years. During the grace period, no repayment of the principal debt was envisaged. During the 5 year grace period,</p> <p>Up to 6% per annum</p> <p>0%,</p> <p>Determined by the Concession Agreement between the Customer and the General Contract with the approval of the Ministry of Finance of the Kyrgyz Republic and the statement of the Cabinet of Ministers of the Kyrgyz Republic. Definition by the Concession Agreement</p>
3.	Analysis and use of recommendations in the Customer's documentation	

3.1	Composition of works	<p>1. Conduct a reconnaissance solution of the Upper Naryn Cascade hydroelectric complexes: Akbulunskaya HPP, Narynskaya HPP-1, Narynskaya HPP-2-3, Narynskaya HPP-3.</p> <p>2. Conduct an analysis:</p> <ul style="list-style-type: none"> -Clarification of placement tolerance and technical and economic indicators priority hydroelectric power plants in the upper reaches of the Naryn. -Clarification of the scheme for using the upper contour of the Naryn River. <p>5. Justify the choice of hydroelectric power station sites (location of sites, layout and composition of the main structures);</p> <p>6. Develop the basic provisions for organizing construction, including determining the deadline and provisions.</p> <p>upon completion of the construction of the Upper Naryn Cascade hydroelectric power stations.</p>
4.	Basic initial data transferred by the Customer before the commencement of	
4.1	List of documentation transferred to the Customer	<p>1. Priority recommended options for the breakdown into stages of use of the Naryn River (Upper Naryn Cascade of Hydroelectric Power Stations) 1992</p> <p>2. Current state of energy systems of the Kyrgyz Republic (tariffs, user, location of substations, power consumption, etc.) and forecasts of its development up to 2020 and 2030.</p> <p>3. Electrical network diagram with metering Connecting hydroelectric power plants to them.</p>

4.2	Materials received by the Contractor in the Kyrgyz Republic from state and authorized bodies on a paid basis	<p>1 Characteristics of all existing water intakes in the area of the Upper Naryn Cascade of Hydroelectric Power Stations: location, purpose (drinking, irrigation, etc.), power source, performance (maximum consumption), consumer data.</p> <p>2 Characteristics of existing routes for water supply and sanitation of villages in the area of the Upper Naryn Cascade of Hydroelectric Power Stations: pipe diameters, tray sizes, flow rates, location on the ground with water intake and discharge points.</p> <p>3 There are characteristics of the presence of wastewater reserves: location, treatment systems, volumes of wastewater.</p> <p>4 Hydrological data on river flows</p> <p>5 Climate data</p> <p>6 Data on seismic conditions of construction sites</p> <p>7 Regulatory and technical documentation in force for construction</p> <p>8 Cartographic material M1:25000, 1:10000, VLS materials (in stock)</p> <p>9 Map of land use by land users (hydroelectric power station structures, mineral quarries and others at a scale of 1:5000;</p> <p>10 Data on land use (boundaries, area, type of use) and the composition of the rights holders of the territory where the main and auxiliary structures, reservoirs of the Upper Naryn Cascade of Hydroelectric Power Stations and the territory falling within the development zone are located.</p>
5.	Basic requirements for the development of design and working documentation Upper Naryn Cascade of Hydroelectric Power Stations	
5.1	Main technical indicators of the hydroelectric power station	<p>At the stage of development of design documentation the following main parameters are used:</p> <p>1. Akbulunskaya hydroelectric power station:</p> <ul style="list-style-type: none"> - installed capacity – 87.4 MW; - the reservoir's normal water level mark is 2315.00 m; - the reservoir's maximum water level is 2314.50 m; - reservoir surface area at normal operating level -

		<ul style="list-style-type: none"> - the total volume of the reservoir is 109.8 million m³; - The useful volume of the reservoir is 2 million m³. <p>2. Narynskaya HPP-1:</p> <ul style="list-style-type: none"> - installed capacity – 47.7 MW; - the reservoir's NPU mark is 2235.0 m; - the reservoir's maximum water level is 2234.5 m; - reservoir surface area at NPU – 1.32 km² <p>3. Narynskaya HPP-2:</p> <ul style="list-style-type: none"> - installed capacity – 47.6 MW; - the reservoir's NPU mark is 2188.0 m; - the reservoir's maximum water level is 2187.5 m; - reservoir surface area at NPU – 0.23 km² <p>4. Narynskaya HPP-3:</p> <ul style="list-style-type: none"> - installed capacity – 55.0 MW; - the reservoir's NPU mark is 2141.0 m; - the reservoir's maximum water level is 2140.5 m; - reservoir surface area at NPU – 0.34 km²
--	--	--

5.2	The composition of the hydraulic structure for the development of design documentation.	<p>List of main structures:</p> <ul style="list-style-type: none"> - Earth dams. - Spillways (including CMEA) - Diversion water receivers. - Derivational compounds. <p>Head units include:</p> <ul style="list-style-type: none"> - Water intake of the main hydroelectric power station. - Pressure water pipelines of the main hydroelectric power station. - The building of the main hydroelectric power station. <p>Pressure station units consisting of:</p> <ul style="list-style-type: none"> - Pressure pool. - Pressure water pipelines. - Building GES. - ORU. <p>List of auxiliary buildings and structures, industrial construction projects, roads, temporary buildings and structures:</p> <ul style="list-style-type: none"> - Mudflow protection structures: <p>Mudflow protection structure on the Burgansu stream; Mudflow protection structure on the Taedzhailo stream.</p>
5.3	Composition of design works	<p>1. Design documentation (development at the project stage).</p> <p>1.1. Perform patent research.</p> <p>1.2. To connect to components</p> <p>hydraulic power plant and design of main units:</p> <p>1.2.1 Development of a digital topographic basis for the construction of sites based on high-precision satellite imagery at scales from 1:200 to 1:4000.</p> <p>1.2.2 Conducting engineering surveys:</p> <ul style="list-style-type: none"> - engineering and geological works. - engineering and hydrometeorological works. - engineering and geodetic works. <p>1.2.2. Justify the layout of the hydraulic structure</p> <p>1.2.3. Justify the parameters and designs of typical structures.</p> <p>1.2.4. Justify the composition and nomenclature of the KIA.</p> <p>1.2.5. Develop architectural solutions for construction as part of a hydroelectric complex.</p> <p>1.2.6. Determine the main volumes of construction work.</p> <p>1.3. Technological equipment:</p> <p>1.3.1. Determine and justify the composition, parameters and main components</p>

		<p>technological equipment, including hydroelectric, auxiliary and electrical equipment.</p> <p>1.3.2. Develop fundamental design solutions and technical requirements for general process equipment: turbine, hydrogenerator, transformer.</p> <p>1.3.3. Develop fundamental design solutions mainly for hydromechanical, lifting and transport equipment and metal structures.</p> <p>1.3.4. Consider heating the SUR valves in winter.</p> <p>1.3.5. Develop fundamental technical solutions for the automated process control system, relay protection and automation, control, communications, and dispatch control.</p> <p>1.3.6. Carry out the project of good needs system, operational system alternating and direct current;</p> <p>1.3.7. In select the data, type and layout of the distribution device based on the Technical Conditions for connecting the hydroelectric power station to the power system, issued in the established manner.</p> <p>1.3.8. Develop fundamental design solutions for fire extinguishing, water supply, drainage, heating and ventilation systems.</p> <p>1.3.9. Determine the main volumes of work and the list of equipment.</p> <p>1.4. For the selected parameters of the hydroelectric power station:</p> <p>1.4.1 Perform water-energy calculations for a long-term series of characteristic operating modes of the hydroelectric power station;</p> <p>1.4.2 Construct curved open surfaces of the reservoir during low water, floods and inundations with the possibility of increased danger;</p> <p>1.4.3 Perform calculations of the initial filling of the reservoir taking into account the growth of the pressure front.</p> <p>passing floods and floods, inputs of units, environmental requirements, etc.</p> <p>1.4.4 Perform calculations for high stock and flood throughput during the period of correct operation;</p> <p>1.4.5 Develop operating modes for hydroelectric power plants in the energy system for working days and weekends, winter and summer weeks in medium- and low-water conditions.</p> <p>1.4.6 Technological design of the placement of each hydroelectric power station</p>
--	--	--

		<p>compliance with current standards of the scheme and fundamental space-planning solutions for the placement of primary and auxiliary equipment, including the main and largest buildings, power plants, complex structures and constructions.</p> <p>1.4.7 Develop drawings for hydromechanical equipment of water-conducting structures, tunnels, and gate chambers.</p> <p>1.4.8 We will perform calculations and development of structural units and types of fastening for pipelines and culverts.</p> <p>1.4.9 We will perform a forecast calculation of filtration losses in the body of dams and hydraulic tunnels. Estimate their volumes of work.</p> <p>1.4.10 Perform calculations of stability and overcoming of slopes of pits and coastal abutments using generally accepted methods;</p> <p>1.4.11 Develop fundamental solutions for fire safety systems</p> <p>1.4.12 Develop requirements and a declaration of safety for hydraulic structures.</p> <p>1.4.13 Operation of the hydraulic structure.</p> <p>-Develop a standard schedule for major repairs of a hydroelectric unit.</p> <p>- Develop measures for organizing the operation of the hydroelectric power station facilities, including a project for the hydroelectric power station utility yard. - Develop an organizational structure for managing the hydroelectric power station and identify its production. Calculate the required work of the hydroelectric power station personnel.</p> <p>- Develop an automated production management system (APMS) and its information, functional, organizational and technical support. - Develop the composition and means of automation and mechanization of labor of hydroelectric power station workers, including separately for performing repair work on the main equipment, buildings and structures, switchgear.</p> <p>- Calculate the composition and professional - qualifications of hydroelectric power station manufacturers, the number and equipment of workplaces.</p> <p>- Calculate the number of personnel involved in contracting organizations to perform repair work on the main equipment, buildings and structures, switchgear.</p> <p>- Develop a package of documents for implementation</p>
--	--	---

		<p>repair work in a businesslike manner.</p> <ul style="list-style-type: none"> - Develop sanitary and hygienic working conditions (Passports). - Develop measures for occupational health and safety, including: solutions for electrical safety, protection from sources of electromagnetic radiation, reduction of industrial noise and vibrations; gas pollution of premises, excess heat, increasing the comfort of working conditions, etc. <p>1.4.14 Participation of the Upper Naryn Cascade of Hydroelectric Power Plants in System Regulation</p> <p>1.5. Develop an organization project manufacturing of the selected components and selected types of main installations for the main construction period, including the following:</p> <p>1.5.1. solutions for external and internal power supply and communications, air supply networks, water supply and sewerage during the construction period;</p> <p>1.5.2. decisions on the location and design of intra-site temporary and permanent roads;</p> <p>1.5.3. construction plan for the main period of construction;</p> <p>1.5.4. construction of bulkheads and organization of drainage solutions;</p> <p>1.5.5. decisions on blocking the Naryn River and allowing for expenses during the construction period;</p> <p>1.5.6. solutions for the transportation of oversized and heavy cargo;</p> <p>1.5.7. solutions for methods of storing topsoil and protecting piles from erosion, flooding, and pollution;</p> <p>1.5.8. construction schedule, work financing schedule.</p> <p>1.6. Develop a list of activities for Environmental protection in the composition of:</p> <p>1.6.1. Characteristics of the conditions and engineering and ecological state of the territory, prerequisites for the placement of hydroelectric power station facilities. The results assess the impact on the environment oily drains of desired waters.</p> <p>1.6.2. Evaluation of project technological solutions from the environmental point of view.</p> <p>Determination of compliance</p>
--	--	---

		<p>regulatory requirements.</p> <p>1.6.3. Measures to prevent and reduce possible negative impacts on the environment and rational use of resources:</p> <ul style="list-style-type: none"> - measures to protect atmospheric air; - measures for the protection and rational use of land and soil resources, including measures for the reclamation of lands and soil cover disturbed during construction; - waste management activities; - measures to protect the subsoil; - measures to protect flora and fauna and the environment; - events, technical solutions and construction, ensuring the rational use and protection of water bodies and aquatic biological resources; - measures to minimize the occurrence of emergency situations; <p>1.6.4. Program of industrial environmental control (monitoring) of the nature of changes in components of the natural environment during the construction and operation of a hydroelectric power station.</p> <p>1.6.5. Local treatment facilities for each station</p> <p>1.6.6. Calculations of environmental damage in natural and monetary terms result from payments for the use of natural resources, for environmental pollution (atmospheric air, water resources, waste).</p>
6.		

	<p>6.1 The composition and quantity of the working documentation being developed.</p>	<p>Documentation checked in the language of the Customer is developed in English:</p> <ul style="list-style-type: none"> - on paper in 4 (four) copies; - for electronic storage in two copies in " tiff " or " pdf " format <p>Customer documentation in English:</p> <ul style="list-style-type: none"> - on paper in 4 (four) copies; - for transfer in two copies in " tiff " or " pdf " format. <p>I. - 5.2. The General Contractor shall commence work and select work at the required time (including intermediate times) specified in the Work Schedule (Appendix No. 3 to this EPC). - contract).
- 5.3. The general contractor undertakes to take into account the comments made by the Customer during the course of the work.
- 5.4. Upon completion of each stage of work, the Work Schedule (Appendix No. 3 to this EPC) is determined. - contract), as well as upon completion of the entire scope of work provided for by this EPC - by contract, the General Contractor is obliged to deliver the work to the Customer
accord

ing to

the corresponding Act of acceptance and transfer of completed works - on intermediate components, Final act of acceptance and transfer of completed work - upon completion of the entire volume of work with the attachment of accounting documents drawn up in accordance with the requirements of the country of the General Contractor, confirming

the actual travel expenses incurred.

- 5.5. The Contractor undertakes not to transfer the Documentation to a third party and not to allow its data to be kept without the written consent of the Customer.
- 5.6. The Contractor shall perform throughout the entire territory all its obligations as provided for in the following sections of this EPC. - contract.

6. Rights and obligations of the Customer

- 6.1. Provide, if necessary, access for the Contractor's representatives to the facilities, taking into account the technical specifications, issue all relevant permits and access to archival data.
- 6.2. EPCs built in on time and in order - Contract, amendment and acceptance of the developed documentation, and if deviations from the EPC are detected - of the contract, negative results of the work, or other deficiencies in the work, immediately notify the General Contractor of this in the manner prescribed by this Agreement.
- 6.3. The Customer is obliged to pay for the work in the manner, on time and under the conditions corresponding to these EPC. - contract.
- 6.4. The Customer will create the result of the Work at any time before the delivery of the Work at the cost of execution of the EPC. - contract, having paid the Contractor for the work actually performed before receiving the Notice of the Customer's refusal to perform the EPC - contract (in this case, it is necessary to pay for the violation).

7. Responsibility of the party

- 7.1. The general contractor is liable for improper preparation Documentation. If deficiencies are found in the Documentation, the Contractor is obliged to eliminate the shortcomings in the Documentation at its own expense and within the timeframes agreed with the Customer, and also to compensate the Customer for the violations caused in full on the basis of the supporting documents submitted.
- 7.2. In case of violation of the deadlines for completion of the Works, as well as each of their stages, of the strict Work Schedule specified in Appendix No. 3, the Customer shall ensure that the work is performed by the General Contractor, paying a penalty in the amount of 0.1% of the cost of the Works not completed on time for each day of delay, but not more than the cost of the overdue work.
- 7.3. In case of violation of the General Contract deadlines for the performance of the Works stipulated in this EPC - a contract that resulted in the Customer violating the deadlines for repatriation of funds, the expenses incurred by the Customer under critical penalty criteria for this violation shall be fully reimbursed by the General Contractor within 10 (ten) banking days from the date of receipt of the Customer's written demands with attached documents confirming the Customer's payment of these penalties.
- 7.4. In case of violation by the Contractor of the general deadline for the performance of the Works for a period exceeding 15 (fifteen) calendar days, against the deadline, determining the Schedule for the performance of the entire volume of Works, the Customer has the right to recover the amount of the advance payment, not confirmed by the performance, by proving the requirements for the bank guarantee, as well as checking the payment of fines in the amount of 5% of the cost of the Works not completed on time, (the fine must be paid within 10 (ten) banking days from the date of the Customer's written demands).
- 7.5. In the cases specified in paragraphs 7.3. and 7.4., the Customer has the right to terminate the EPC. - a unilateral extrajudicial contract. EPC - the contract in this case will be considered terminated from the date of receipt of the Customer's written notice. The date of receipt of notices is the sending of color fax messages to the Customer.
- 7.6. When performing work on the Customer's territory, the General Contractor shall be responsible for ensuring that its personnel comply with the requirements of labor protection standards, as well as the internal labor regulations of the Customer when performing work under this EPC. - contract.
- 7.7. In case of delay, make payments in accordance with the conditions established in accordance with paragraph 3 of this EPC. - contract, the Customer pays the General Contractor a penalty

in the community in the amount of 0.1% of the amount not paid on time for each day of delay, but not more than the amount of the overdue payment. In this case, the Contractor has the right to extend the term of performance of the work for the period of delay in payment of the Customer, and is exempted from paying penalties in the form of delay for this period.

8. Force majeure

- 8.1. The parties shall be released from property liability for partial or complete failure to fulfill their obligations under the contract if such failure is caused by force majeure circumstances that arise after the conclusion of this EPC. - contract. These include events beyond the control of the parties, circumstances that the parties could neither foresee nor prevent by reasonable measures, including, but not limited to, strikes, mass persecutions or civil unrest, terrorist acts, wars, accidents, fires, floods, earthquakes and other natural disasters.
- 8.2. A party has the right to refer to the circumstances specified in clause 8.1 only if such circumstances directly depend on the possibility of fulfilling this EPC condition. - contract. The party for whom it became impossible to perform its parts under the EPC - The contract must notify the other party in writing of the occurrence and duration of the events taking place, but no later than 5 (five) calendar days from the date of their occurrence.
- 8.3. Notification of force majeure circumstances not completed within the specified period deprives the relevant Party of the right to refer to these circumstances in the future as a benefit releasing it from liability for failure to fulfill obligations under this Agreement.
- 8.4. The Chamber of Commerce and Industry of the relevant country is the provision of confirmation of the validity and duration of the most important circumstances. The latter must be submitted by the relevant Party no later than 15 calendar days from the date of compliance with the relevant conditions.
- 8.5. In the event that force majeure circumstances and their consequences continue to operate for more than 30 calendar days or when, upon the occurrence of such circumstances, it becomes clear that their consequences will operate for more than this period, the Parties shall, in the shortest possible time, implement acceptable standards in terms of alternative methods of executing the Agreement acceptable to the latter party.

9. Dispute resolution procedure

- 9.1. The Parties shall take all measures to resolve disputes and disagreements that may arise during the execution of this EPC. - contract, thus.
- 9.2. The parties establish a mandatory claims procedure for resolving disputes and disagreements, as well as any claims within the EPC - The contract must be drawn up in writing and reviewed by the recipient Party within 10 (ten) calendar days from the date of its receipt.

In this case, the term "confidential information" in the EPC - the contract is understood as both documented and undocumented information.
- 10.2. Each party assumes responsibility for maintaining the confidentiality of information obtained during the execution of this D EPC. - contract, and coordinate all issues taking into account the observance of confidential secrets. In the event of disclosure of confidential information by one party, the guilty party is obliged to compensate the other party in full for any losses incurred in connection with the disclosure or unauthorized use of this information.
- 10.3. The provision of documents and the disclosure of state constitutions and local government

constitutions in accordance with their legal procedure shall not constitute disclosure of confidential information.

- 10.4. The obligations of the party to maintain confidentiality shall remain in force even after the actions under this appeal have been taken for ten years and the prosecution of the party's successors.

11. Duration of the EPC contract

- 11.1. Real EPC - The Contract shall enter into force from the date of signing this Agreement until the full fulfillment of its obligations under the EPC. - contract.
- 11.2. Unilateral termination is not regulated by law, except in cases provided for by the obligations of the Kyrgyz Republic and this EPC. - contract.

12. Additional terms

- 12.1. Any., claim or other notice transmitted by the notifying party personally, by facsimile or by electronic mail, shall be deemed to have been received on the date of its transmission. Receipt of identified notices, claims or notices must be acknowledged in writing in the same manner in which they were transmitted. If the date or the last day of the period for performance of any obligations under this EPC - the contract is non-working, the date or the last day of the term for the performance of the relevant obligations is postponed to the first working day, the next day or the date of performance provided for in this EPC - contract.
- 12.2. All changes and additions to this EPC - The contract shall enter into force only if it is drawn up in writing and duly signed by competent persons authorized by the institutions.
- 12.3. In the event that no results are achieved during the protocol approval process, changes should be made to this part of the Agreement in order to transfer the volume of supply to the court.
- 12.4. Neither party may transfer or assign its rights and obligations under this EPC. - A contract without a written agreement by one party to sign it.
- 12.5. All appendices, protocols and other documents attached to this date
The agreement is its fiduciary part.
- 12.6. All documents for this EPC - a contract sent by fax or
by e-mail are legally binding if no later than 3 working days, in the next day of the fax or message, sending of the original is confirmed by an express mail receipt. Originals must be provided within 10 (ten) calendar days.
- 12.7. The parties shall notify each other of the repair of the props within three days from the date of their replacement. In the event of failure to fulfill these obligations, the party that did not notify shall not make demands on the other party to the dispute that arose due to the ignorance of that party.
- 12.8. Real EPC - an agreement concluded in English in 2 copies, one for each party, has equal legal force.
- 12.9. Technical provisions of this EPC - the contract will open
are invalid or lose their force, all other provisions shall remain in force.
- 12.10. The parties by mutual agreement declare and note the following:
- what signatory exists
full representative of that Party,

- 1.3.2 Instructions for filling out the Protocol of Disagreements to the EPC Contract Project
- 1.3.2.1 The participant of the competition provides the number and letters of submission of proposals, an appendix to this technical proposal.
- 1.3.2.2 The participant of the competition indicates his/her company name (incl. organizational and legal form) and your address.
- 1.3.2.3 This form is transformed as in the case of awarding a diploma to a competition participant. requirements or proposals for the definition of the EPC contract project, and in the case of such requirements or proposals; in the latter case, the tables contain the words “We agree with the proposed EPC contract project ”.
- 1.3.2.4 If the Tender Participant proposes to make changes to the draft EPC contract, the Tender Participant must submit this protocol of disagreements as part of its application for participation in the Tender. In the prepared protocol of disagreements, the Tender Participant must strictly adhere to the mandatory and desirable conditions of the EPC contract for it. "Mandatory" here considers proposals and conditions, in case of non-acceptance of which it will refuse to sign the Agreement. "Desirable" here considers proposals on the terms of the EPC contract , which it offers to retain the Tender Organizer, but a rejection that the Tender Organizer does not accept the Tender Participant's refusal to sign the EPC contract in the event it is recognized as the Winner of the Tender.
- 1.3.2.5 The Customer reserves the right to pay attention to and accept proposals and additional (not fundamental) changes to the EPC contract before signing the EPC contract. If the parties fail to reach an agreement on the changes, the parties will expect to sign the Agreement on the terms set out in this Tender Documentation and the Tender Application of the Tender Winner.
- 1.3.2.6 In any case, the participant of the Competition must keep in mind that:
- a) if any of the mandatory Contractual Proposals and conditions put forward by the Participant are unacceptable to the Competition Organizer, such application for participation in the Competition will be rejected regardless of the content of the technical and commercial proposals;
 - б) In any case, the provision to the Tender Participant of a protocol of disagreements on the initial draft of the Agreement prepared by the Customer does not deprive the Tender Participant and the Customer of the right to discuss these conditions and change them during the pre-contractual procedures in order to reach an agreement regarding changes to these conditions.

Appendix to this is this calendar plan for the execution of works.

1.4.2.2 The participant of the competition indicates his/her company name (incl. organizational and legal form) and your address.

1.4.2.3 In this calendar plan, the execution of works is established in the established volume, the estimated timeframes for the execution of all types of works and services within the framework of the Agreement.

1.4.2.4 To indicate the timeframes, a sign should be indicated next to each stage/substage, or the column number should be given, for example:

Item No.	Description of stages	Execution schedule, in weeks from signing of EPC -contract								
		1 week	Week 2	Week 3	Week 4	Week 5	Week 6	7 week	Week 8	etc.
1	2	3	4	5	6	7	8	9	10	11
1.	Work 1									
2.	Work 1.1									
3.	Delivery 1.2									
4.	Work 1.3									
5.										

1.4.2.5 A work schedule can also be created using project management software (such as Microsoft). Project etc.).

1.4.2.6 The Work Schedule will serve to prepare the equipment for the EPC contract. In this regard, during the review, the costs of effort and time of the Customer and the Bidder for the preparation of the EPC contract are compiled, this Work Schedule should be prepared so that it can be included in the EPC contract with the changes made.

1.5 Summary table of work costs (form 5)

1.5.1 Form of summary table of work costs

beginning of form

Appendix No. 4 to the letter of submission of proposals

from " _ " year No. _____

Summary table of work costs

Name and address of the competition participant: _____

The prices currently accepted for applications to participate in the competition are: “ _ ”
_____ 201__

Item No.	Type of work	Ed. amend.	Quantity	Unit price, USD (1 USD = 1 US dollar) (excluding VAT)	Total cost, USD (1 USD = 1 US dollar) (excluding VAT)	Notes
1	2	3	4	5	6	7
TOTAL without VAT, USD (1 USD = 1 US dollar)				X		
VAT, USD (1 cu = 1 US dollar)				X		
TOTAL with VAT, USD (1 USD = 1 US dollar)				X		

The cost of work is calculated on the basis of an estimate.

(signature, M.P.)

(last name, first name, patronymic of the signatory, position)

end of form

1.5.3 Instructions for filling

1.5.3.1 The participant of the competition provides the number and inscriptions about the submission of proposals,

An appendix to this is a successful job cost summary table.

1.5.3.2 The participant of the competition indicates his/her company name (incl. organizational and legal form) and your address.

1.5.3.3 The participant of the competition notes that he has calculated the Summary Table of the Cost of Works.

1.5.3.4 The summary table contains the cost of work for the corresponding name of the work performed, the unit of measurement of the volume of work, the volume of work in the specified units of measurement, a single price, and the total cost of the work performed, obtained by multiplying the volume of work by a single price. Notes and comments may also be provided.

1.5.3.5 The summary table of the cost of work will serve to prepare the equipment for the Contract. In this regard, the table calculates the effort and time costs of the Customer and the Tender Participant for preparing the Contract. This Summary Table of the Cost of Work should be prepared so that it can be included in the Contract as an estimate with the changes made. In this case, the Summary Table of the Cost of Work must fully correspond to the estimate presented in the technical specifications.

1.5.3.6 Appendix No. 1 to the Summary Table of Work Costs must be filled out in Excel format and payment as part of the application (in an electronic copy).

1.6 Schedule of payment for work performed (form 6)**1.6.1 Form of graphics payment for work performed****beginning of form**
