documentation of changes made to the tender documentation before the end date submission of applications for participation in the competition, such period was not less than 45 (forty-five) calendar days.

3.5.4. All Applicants/Participants in the competition who have officially received this competition documentation will be immediately notified of the nature of the changes using communication means (telephone, fax, e-mail).

3.6. Costs of participation in the competition

3.6.1. The Applicant/Participant in the competition shall independently bear all expenses related to participation in the competition, including the preparation and submission of an application for participation in the competition and other documentation, and the Competition Organizer shall have no obligations for these expenses regardless of the results of the competition or the grounds for its completion.

3.6.2. The applicant for participation in the competition/Participants in the competition shall not have the right to demand compensation for lost profits incurred during the preparation for the competition and the holding of the competition.

3.7. Refusal to hold a competition

3.7.1. The Customer/Organizer of the competition who has posted a notice on the website has the right to refuse to hold the competition within the time period specified in the notice without giving any reasons.

3.7.2. The notice of refusal to hold the competition shall be posted by the Competition Organizer within 2 (two) days from the date of the decision to refuse to hold the competition, but no later than the deadline for submitting applications for participation in the competition.

3.8. Ensuring the fulfillment of obligations related to the submission of an application for participation in competition

3.8.1. The Competition Organizer shall establish requirements for ensuring the fulfillment of the obligations of the Competition Participant related to the submission of an application for participation in the Competition, which guarantees the following obligations of the Competition Participant:

- A) an obligation not to change or withdraw your application for participation in the competition during its validity period after the expiration of the deadline for accepting applications for participation in the competition;
- b) an obligation not to provide knowingly false information or intentionally distort information or documents provided as part of the application for participation in the competition;
- V) an obligation to sign the Protocol on the results of the open competition in the manner prescribed in the section of this competition documentation in the event that the Competition Participant is recognized as the Winner;
- G) obligation to conclude an EPC contract in accordance with the procedure established by this tender documentation.

3.8.2. The Competition Organizer has established the following method for ensuring the fulfillment of the obligations of the Competition Participant related to the submission of an application for participation in the competition:

3.8.2.1. A bank guarantee in the amount of 1% of the Contract value, drawn up taking into account the following conditions:

- The bank guarantee must be irrevocable.
 - The amount of the bank guarantee must be expressed in **US dollars**.
 - The bank guarantee must be valid for the duration of the application for participation in the competition plus 10 (ten) calendar days.
 - The beneficiary in the bank guarantee must be the Organizer of the competition, the principal must be the Participant of the competition, and the guarantor must be the bank that issued the bank guarantee.
- a) The bank guarantee for participation in the Competition must provide for the unconditional right of the Competition Organizer to claim the amount of the bank guarantee in full or in part in the following cases: a) changes or withdrawal of the application for participation in the Competition during its validity period after

expiration of the deadline for accepting applications for participation in the competition;

b) providing knowingly false information or intentionally distorting information or documents included in the application for participation in the competition;

b) refusal of the Winner of the competition to sign the Protocol on the results of the open competition in the manner prescribed by this competition documentation;

V) refusal of the Winner of the competition to conclude the Agreement in the manner established by this competition documentation.

- The bank guarantee must stipulate that in order to claim the security amount, the Competition Organizer sends to the guarantor only a written request and the original bank guarantee.
- Payment under the bank guarantee must be made within 5 (five) working days after the beneficiary's request.
- The bank guarantee must not contain any conditions or requirements that contradict the above or make the above unenforceable.
- The bank guarantee must be issued by a bank that is reliably known to be neither unprofitable nor bankrupt, nor under external management, nor has its license been suspended in whole or in part.
- The original bank guarantee must be delivered to the Competition Organizer before the deadline for accepting applications for participation in the competition.

3.8.3. In the event of failure to fulfill or improper fulfillment of the above-mentioned obligations by the Competition Participant, the Competition Organizer reserves the right, at its own discretion, to present the guarantor bank with the amount of security for the fulfillment of obligations for payment.

3.8.4. The bank guarantee as security for the performance of the obligations of the Tender Participant related to the submission of an application for participation in the tender shall be returned to the Tender Winner within 3 (three) days from the date of signing the agreement.

3.8.5. The security for the performance of the obligations of the Tender Participant related to the submission of an application for participation in the tender shall be returned to the other Tender Participants (upon their request) within 5 (five) business days after signing the agreement with the Tender Winner, declaring the tender invalid, or expiration of the application for participation in the tender (whichever occurs first). 3.8.6. Failure to provide security for the obligations of the Tender Participant shall be grounds for rejecting the application for participation in the tender.

3.9. Return of applications for participation in the competition

3.9.1. All applications for participation in the competition, as well as individual documents included in the application for participation in the competition, submitted to the competition, will not be returned. 3.9.2.

Participants of the competition have no right to influence, participate or be present during the review and evaluation of applications for participation in the competition, and also establish contacts with persons performing the examination of applications for participation in the competition

competition. Any attempts by the Competition Participants to influence the Competition Committee during the examination of applications for participation in the competition or for the award of a contract, as well as to exert pressure on any person engaged by the Competition Organizer to work in the competition, if these facts are confirmed by documents, serve as grounds for rejecting applications for participation in the competition of such Competition Participants.

3.14.1.4. During the review and evaluation of applications for participation in the competition, the Competition Organizer has the right to request from the relevant government authorities, as well as legal entities and individuals specified in the application for participation in the competition and appendices thereto, information on the accuracy of the information specified in the application for participation in the competition.

3.14.1.5. If there are any doubts about the authenticity of the copy of the document, the Competition Organizer has the right to request for review the original document provided in a copy. If the Participant of the Competition does not provide the original document within the time period specified in the request, the copy of the document will not be considered and the document will be considered not provided.

3.14.1.6. The review and evaluation of applications for participation in the competition includes a selection stage and evaluation stage.

3.14.2. Selection stage

3.14.2.1. The Tender Committee shall, within the period specified in **notification** carries out the review applications for participation in the competition and competition participants for their compliance with the requirements established by the legislation of the Kyrgyz Republic and these competition documents, and determines the list of participants in the procurement procedure admitted to further participation in the competition.

3.14.2.2. As part of the selection stage, the Competition Committee checks:

- compliance of applications for participation in the competition with the requirements this tender documentation;
- correspondence Participants of the competition meet the requirements of this tender documentation;
- correspondence commercial and technical proposals requirements of this tender documentation.

3.14.2.3. The application for participation in the competition must fully comply with each of the requirements established by this tender documentation or be better, i.e. the specified requirements are threshold. The tender committee has the right to reject participants from further participation in the tender in the following cases:

- failure to submit the required documents, in accordance with this tender documentation of documents, or the presence in such documents of false information about the Participant of the competition, including the involved subcontractors/co-executors (if involved), or about the proposed work;
- non-compliance of the Tender Participant, including the subcontractors/co-executors involved (if involved), with the requirements established in this tender documentation;
- non-compliance of the application for participation in the competition with the requirements of this competition documentation.

3.14.2.4. If there are discrepancies between the designation of amounts in words and in figures, then the competition committee will accept for consideration the amount indicated in words.

3.14.2.5. In the event that the Tender Committee establishes that the information is unreliable, contained in the documents submitted by the Participant of the competition, establishing the fact of liquidation of the Participant of the competition - a legal entity or bankruptcy proceedings in relation to the Participant of the competition - a legal entity, an individual entrepreneur, or the fact of suspension of its activities in the manner prescribed by the legislation of the State in which the Participant is registered, as well as,

if the Participant of the competition has arrears in accrued taxes, fees and other mandatory payments to budgets of any level or state extra-budgetary funds for the past calendar year, the amount of which exceeds (5) percent of the book value of the participant's assets, the Tender Committee will disqualify such participant from participating in the tender at any stage of its implementation.

3.14.2.6. Based on the results of the selection stage of consideration and evaluation of applications for participation in the competition The Competition Committee makes a decision on admission to further participation in the competition or on refusal to admit to further participation in the competition, and also draws up a Protocol for reviewing applications for participation in the competition. The said protocol is posted on the website specified in paragraph 3.1.1 within 3 (three) days following the day of signing the protocol.

3.14.2.7. If, based on the results of the selection stage of consideration and evaluation of applications for participation in the competition, a decision is made to refuse admission to further participation in the competition of all Participants of the competition who submitted applications for participation in the competition, or to admit to further participation in the competition only one Participant of the competition who submitted an application for participation in the competition, the competition is declared invalid.

3.14.3. Evaluation stage

3.14.3.1. As part of the evaluation stage, the Tender Committee evaluates and compares applications for participation in the competition and ranks them according to their degree of preference for the Customer.

3.14.4. Procedure for evaluation and comparison of applications for participation in the competition

3.14.4.1. The evaluation and comparison of applications for participation in the competition is carried out by the Competition commission in order to identify the best conditions for the execution of the contract.

3.14.4.2. Based on the results of the evaluation of applications for participation in the competition of the Competition The commission assigns a serial number to each application for participation in the competition, relative to others, in order of decreasing degree of advantage of the terms of execution of the contract contained in them. The first number is assigned to the application for participation in the competition that has the best combination of terms of execution of the contract.

3.14.5. Summing up the results of the competition. Determining the winner of the competition

3.14.5.1. Based on the results of the evaluation of applications for participation in the competition submitted In the event that the competition is recognized as valid, the Competition Committee determines the Winner of the competition.

3.14.5.2. The winner of the competition is the Participant of the competition who proposed the best combination of terms of execution of the contract and the application for participation in the competition for which the first number was assigned.

3.14.5.3. Based on the results of the competition, a Protocol for the selection of the Winner is drawn up, containing information about the place, date, time of the evaluation and comparison of applications for participation in the competition, about the participants of the competition whose applications for participation in the competition were reviewed, about the results of the evaluation and comparison of applications for participation in the competition, the results of the competition, about the decisions made with respect to the Participants of the competition with their justification, about the Winner of the competition, about the Participant of the competition whose application for participation in the competition took second place, their name (for legal entities), last name, first name, patronymic (for individuals), postal address.

3.14.5.4. The protocol for selecting the Winner is posted on the website and in the media specified in subparagraph 3.1.1. within 10 (ten) days from the date of signing this protocol.

3.14.5.5. Any participant of the competition after the posting of the Protocol for the selection of the Winner The participant of the competition has the right to send to the Organizer of the competition in writing a request for clarification of the results of the competition. The Organizer of the competition is obliged to provide the Participant of the competition with the corresponding clarifications in writing within 5 (five) working days from the date of receipt of such a request.

3.15. Signing of the protocol on the results of the open tender and conclusion of the EPC -

contract with the winner of the competition

- 3.15.1. The organizer of the competition within 5 (five) working days from the date of signing The Protocol on the selection of the Winner of the competition is transferred to the Winner of the competition by the Protocol on the results of the open competition. The Winner of the competition is obliged to provide the Organizer of the competition with the Protocol on the results of the open competition, signed and certified by the seal on his part, within 10 (ten) days from the date of sending the said protocol.
- 3.15.2. The EPC contract with the winner of the tender will be concluded within the period specified in point 14 of the notice.
- 3.15.3. In cases where the Winner of the Competition evades concluding a contract for
In accordance with the terms of this tender documentation, the Customer has the right to conclude an agreement with the Tender Participant whose application for participation in the tender has been assigned the second number, recording this circumstance in the relevant protocol.
- 3.15.4. In the event of evasion by the Participant of the competition, whose application for participation in the competition assigned the second number, from the conclusion of the contract, the Customer has the right to make a decision to declare the competition invalid.
- 3.15.5. If the Winner of the Competition or the Participant of the Competition submits an application for participation in the tender for which the second number has been assigned, or the Participant with whom EPC contracts are concluded in accordance with clause 3.15, has not submitted a signed contract to the Customer within the time period specified in the tender documentation, the Winner of the tender, or the Participant in the tender whose application for participation in the tender has been assigned the second number, or the Participant with whom the contract is concluded, shall be deemed to have evaded concluding the contract.

3.15.6. TECHNICAL PART

4. TECHNICAL SPECIFICATIONS

The technical specifications are provided in Appendix No. 1 to this tender documentation and are an integral part thereof.

5. EPC project - contract for open competitive bidding for the construction of the 1st stage of the Kara-Kechin TPP with an installed capacity of 1200 MW (1st stage 2x300 MW; 2nd stage 1x600 MW) in the Naryn region of the Kyrgyz Republic with the output of capacity to the 500 kV power system of Kyrgyzstan.

5.1. EPC project – construction contract 1st stage Kara-Kechinskaya TPP with an installed capacity of 1200 MW (stage 1 2x300 MW; stage 2 2x600 MW) in the Naryn region of the Kyrgyz Republic with the output of power into the energy system of Kyrgyzstan 500 kV

Sh. REQUIREMENTS

6. REQUIREMENTS FOR PARTICIPANTS AND FOR THE APPLICATION FOR PARTICIPATION IN THE COMPETITION

6.1. General requirements for the application for participation in the competition

6.1.1. For the purposes of these tender documentation, an application for participation in the tender shall be understood to mean a proposal submitted by a Tender Participant to participate in the tender, made in writing in the form of a document executed in accordance with the provisions of this section, with an attached full set of documents according to the list specified in these tender documentation, the content of which complies with the requirements of these tender documentation.

6.1.2. A Participant of the Competition has the right to submit only one application for participation in the Competition. In the event that the fact of submission of two or more applications for participation in the Competition by one Participant of the Competition is established, provided that the previously submitted applications for participation in the Competition by such Participant of the Competition have not been withdrawn, all applications for participation in the Competition by such Participant of the Competition shall not be considered.

- 6.1.3. Each document included in the application for participation in the competition must be signed by a person entitled, in accordance with the current legislation of the Kyrgyz Republic, to act on behalf of the Applicant for participation in the competition/ Participant in the competition without a power of attorney, or by a person duly authorized by him on the basis of a power of attorney (hereinafter referred to as the authorized person). In the latter case, the original power of attorney is attached to the application for participation in the competition. Facsimile reproduction of the signature is not permitted.
- 6.1.4. Each document included in the application for participation in the competition must be sealed with the seal of the Competition Participant.
- 6.1.5. The documents submitted as part of the application for participation in the competition must be clearly printed. Erasures, additions, corrections are not allowed, except for those cases when these corrections (additions) are certified by the handwritten inscription "corrected/verified", the personal signature of the authorized person located next to each correction (addition) and certified by the seal of the Participant of the competition.
- 6.1.6. A participant in the competition must submit an application for participation in the competition, including:
- A) Letter of submission of an offer in the form and in accordance with the instructions provided in this Tender Documentation;
 - b) Technical proposal in the form and in accordance with the instructions provided in this Tender Documentation;
 - V) The protocol of disagreements to the draft EPC contract in the form and in accordance with the instructions provided in this Tender Documentation; The
 - G) calendar plan for the execution of works, in the form and in accordance with the instructions provided in this Tender Documentation; The summary table of the
 - d) cost of works, in the form and in accordance with the instructions provided in this Tender Documentation;
 - e) Payment schedule for the performance of work, in the form and in accordance with the instructions provided in this Tender Documentation;
 - and) The Participant's application form, in the form and in accordance with the instructions provided in this Competition Documentation;
 - c) A certificate of the list and annual volumes of execution of similar contracts, in the form and in accordance with the instructions provided in this Tender Documentation;
 - And) Plan for the distribution of work volumes between the general contractor and subcontractors;
 - To) Plan for distributing the volume of work performed/performance of work within a collective participant;
 - l) An information letter about the existence of connections of the Competition Participant that are of an affiliation nature with the employees of the Customer or the Competition Organizer, in the form and in accordance with the instructions provided in this Competition Documentation;
 - m) Documents confirming the compliance of the work performed with established requirements.
- 6.1.7. Additional information carriers (floppy disks, CD-R, CD-RW, brochures, books) should, if possible, be appropriately marked (e.g. with stickers) and placed in separate (so-called "information") envelopes. Information envelopes should be placed after the last page of the application for participation in the competition. Copies of documents confirming the legal status of the Competition Participant (charters, articles of incorporation, etc.) included in the application for participation in the competition are placed in information envelopes only if they are printed and bound industrially (typographically) or stitched by a notary.
- 6.1.8. All pages without exception must be numbered and

information envelopes of the application for participation in the competition (as internal numbering sheets of individual appendices, as well as continuous numbering of all pages of the application for participation in the competition; information envelopes are numbered separately from the pages - "information envelope No. 1", "information envelope No. 2", etc.). The numbering of pages of books, brochures, magazines, etc., placed in information envelopes, is not performed.

6.1.9. The documents (sheets and information envelopes) included in the application for participation in the competition must be fastened or packed in such a way as to prevent accidental loss or movement of pages and information envelopes. If the application for participation in the competition consists of several volumes, it is recommended that each volume be bound with an appendix of an inventory of the documents included in it. Each such volume must have continuous page numbering. An inventory of documents must be included in the application for participation in the competition.

6.1.10. The participant of the competition must prepare 1 (one) copy of the application for participation in the competition on paper. A copy of the application for participation in the competition is prepared by photocopying the originals of each document included in the application for participation in the competition after they have been signed and certified with a seal, as well as by applying continuous page numbering before stitching.

6.1.11. The participant of the competition must also prepare 1 (one) copy of the application for participation in competition in electronic form. A copy of the application for participation in the competition is prepared by scanning all documents included in the application for participation in the competition after they have been signed and certified with a seal, in either .tiff (multi-page) or . pdf format. A copy of the application for participation in the competition is also prepared in Word and Excel formats. The electronic version must be recorded on a CD-R(W), DVD-R(W) disk or other electronic media and enclosed in an envelope with the original application for participation in the competition.

6.1.12. Failure to submit an electronic version of the application for participation in the competition by the participant is the reason for its rejection.

6.1.13. The materials contained in the information envelopes may be copied by any in a manner acceptable for the given type of materials. The corresponding copies are placed in envelopes and marked "copy of information envelope No. 1", etc.). If it is impossible to provide copies of the materials contained in the information envelopes, the Contest Participant places a reference in the information envelope indicating: "see information envelope No. ... of the application for participation in the competition").

6.2. General requirements for the legal capacity and competence of the Competition Participants

6.2.1. A legal entity of any organizational and legal status may participate in the competition forms. However, in order to qualify for the tender and obtain the right to conclude with the Customer an EPC contract for open competitive bidding for the construction of the 1st stage of the Kara-Kechin TPP with an installed capacity of 1200 MW (stage 1 2x300 MW and stage 2 1x600 MW) in the Naryn region of the Kyrgyz Republic. The participant independently or the collective participant as a whole must meet the following requirements:

6.2.1.1. Legal entities registered in this capacity in the territory of the Kyrgyz Republic or a foreign state (as well as several performers that constitute a group of legal entities formed in accordance with current legislation), which meet the requirements established in this Documentation.

 - Hydrologist;
 - EIA Expert;
 - Geologist;
 - Electrical engineer;
 - Thermal Mechanical Equipment Engineer;
 - Engineer for auxiliary process equipment of thermal power plants;
 - Energy market expert with experience in modeling electricity price trends.
- 6.4.6. Ownership or long-term lease of special equipment for the installation and assembly of large units of power units and structures and for the performance of mining and capital works in the organization of coal mining.
- 6.4.7. Experience in designing and constructing thermal power plants with an installed capacity of at least 600 MW (at least 1 project over the past 5 years);
- 6.4.8. Experience in designing and operating thermal power plants with an installed capacity of a single power unit of more than 300 MW (at least 1 project over the past 5 years);
- 6.4.9. Experience in designing and constructing thermal power plants in regions with high (at least 9 points) seismic hazard (at least 1 project over the past 5 years);
- 6.4.10. Experience in designing and constructing 500 kV overhead power lines and substations.

6.4.11. At the time of application, the company must be in the process of implementing design or support of at least 1 work on their main activity;

6.4.12. Availability of at least 1 project over the last 10 years, the approval of which was carried out simultaneously in 2 or more countries;

6.4.13. Having at least 3 years of development experience projects over the past 10 years approved by leading banks and financial institutions;

6.4.14. The presence of personnel with academic degrees (Master's, Doctor of Science) in the company.

All the above intelligence should be confirmed by way provision of relevant documents, certificates, resumes, copies of contracts, etc. as part of the competitive application.

6.5. Validity period of the application for participation in the competition

6.5.1. The application for participation in the competition is valid for the period specified by the Participant. competition in this application, but not less than 180 (one hundred eighty) calendar days from the day following the day of the procedure for opening the received envelopes with applications for participation in the competition.

6.6. Official language of the competition

6.6.1. The application for participation in the competition prepared by the Participant of the competition, as well as all Correspondence and documentation related to the competition, exchanged between Applicants/Participants and the Competition Organizer, must be written in Russian.

6.6.2. Any supporting documents and printed materials submitted by a participant in the procurement procedure may be drawn up in a foreign language if such materials are accompanied by an accurate, notarized translation into Russian.

6.6.3. The use of other languages to prepare an application for participation in the competition may be regarded by the competition committee as a non-compliance of the application for participation in the competition with the requirements established by the competition documentation.

6.7. Competition currency

6.7.1. All amounts of money in the application for participation in the competition and its appendices must be expressed in a currency set in US dollars.

6.7.2. Documents, the originals of which are issued to the Participant of the Competition by third parties expressing amounts of money in other currencies, may be submitted in the currency of the original, provided that comments are attached to these documents with the conversion of these amounts into the currency established by subparagraph 6.7.1 of this Competition Documentation, based on the official exchange rate established by the National Bank of the Kyrgyz Republic, indicating such rate and the date of its establishment.

6.7.3. Expression of monetary amounts in other currencies, except for cases provided for in paragraphs 7.7.1, 7.7.2, may be regarded by the Tender Committee as non-compliance of the application for participation in the tender with the requirements established by the tender documentation.

6.8. Maximum (limit) contract price

6.8.1. The maximum (limit) contract price (lot price) is specified in paragraph 9 of the notification.

6.9. Price of the application for participation in the competition and the contract

6.9.1. The price of the application for participation in the competition must include all costs and risks associated with the performance of works, services, supply and delivery of goods and materials under the terms of delivery specified in the contract. In this case, the price of the application for participation in the competition includes any fees and duties, costs and risks associated with the performance of the contract, including the warranty period of operation of the goods and other costs.

6.9.2. The participant of the competition sets the price in his application for participation in the competition.

applications that are firm (fixed) and include consideration of inflation and other financial risks for the entire period of the contract. The contract price is not adjusted due to inflation and changes in exchange rates during the contract period.

6.9.3. The Tender Participant must indicate the prices for all work to be performed, proposed in the application for participation in the Tender. If the Tender Participant does not indicate the cost of individual items of work to be performed, the Customer will not pay them for their cost and will consider them included in the contract price.

6.9.4. The price is maximum and can be reduced.

6.9.5. When preparing an application for participation in the competition, the applicant must independently take into account all risks associated with the possibility of increasing the contract price. The Customer shall not consider the issue of increasing the contract price based on the results of design and survey work, unless this is expressly provided for by the legislation of the Kyrgyz Republic.

6.9.6. If the Participant's application does not comply with the conditions of this subsection, the Competition Organizer may reject his application to participate in the competition.

6.10. Involvement of subcontractors/co-performers

6.10.1. The tender documentation provides for opportunity attraction subcontractors/co-performers. The Tenderer must include in its application for participation in the Tender detailed information on all the works that it intends to perform under subcontracts, indicating the percentage of the subcontract to the volume of works, and provide detailed information on its subcontractors/co-performers that it intends to hire to perform the contract. The Tenderer must submit as part of its application for participation in the Tender letters from subcontractors/co-performers to the Tender Organizer, which indicate that the subcontractor/co-performer has been informed that the Tenderer is offering works, and if the Tenderer is recognized as the winner, it is ready to ensure the performance of works in the volumes and within the specified timeframes specified in the application for participation in the Tender, and the terms of the future contract between the Tenderer and the subcontractor/co-performer have been agreed upon.

6.10.2. If the volume of the subcontract exceeds 10 (ten) percent of the contract price, the Tender Participant must submit, as part of its application for participation in the tender, documents confirming the compliance of the proposed subcontractor/co-contractor with the requirements of 6.4. imposed on Tender Participants in the part related to the volume of work performed by this subcontractor/co-contractor.

6.10.3. When considering an application for participation in the tender, the tender committee may reject any subcontractor/co-contractor proposed in the application for participation in the tender without explaining the reasons for such rejection. If a subcontractor/co-contractor is rejected, the Tender Participant, without changing the terms of his/her application for participation in the tender, must propose another subcontractor/co-contractor that meets the requirements for approval by the Tender Organizer (Customer).

6.11. Participation in the competition of collective participants

6.11.1. If an application for participation in the competition is submitted by a collective participant, Additionally, the following requirements must be met.

6.11.2. Each organization that is part of a collective participant must meet the requirements of this tender documentation.

6.11.3. The organizations representing the collective participant conclude among themselves an agreement that complies with the provisions of the Civil Code of the Kyrgyz Republic and meets the following requirements:

- A) the agreement must clearly define the rights and obligations of the parties both within the framework of participation in the competition and within the framework of the execution of the contract;

- b) the agreement must provide a clear distribution nomenclature, volumes, cost and timing of deliveries between members of a collective participant;
- V) the agreement must define a leader who will subsequently represent the interests of each of the organizations included in the collective participant in relations with the Competition Organizer and the Customer;
- G) the agreement must establish subsidiary liability of each organization for obligations related to participation in the competition, and joint and several liability for the timely and complete fulfillment of the agreement;
- d) The agreement must stipulate that all operations for the execution of the contract as a whole, including payments, are carried out exclusively with the leader, however, at the request of the Customer or on his initiative, this scheme can be changed.

6.11.4. Any organization can be a part of only one collective

participant and does not have the right to take part in the competition independently.

6.11.5. In connection with the above, the collective participant prepares an application for participation in competition, taking into account the following additional requirements:

- A) an application for participation in the competition must include information confirming the compliance of each member of the collective participant with the established requirements;
- b) an application for participation in the competition is prepared and submitted by the leader on his own behalf with a reference to the fact that he represents the interests of the collective participant;
- V) The application for participation in the competition additionally includes a notarized copy of the agreement between the organizations that make up the collective participant;
- G) The application for participation in the competition must additionally include information on the distribution of the product range, volumes, cost and delivery times among the members of the collective participant.

6.11.6. When assessing the quantitative parameters of the activities of the members of the association, these parameters are summed up. Non-summable parameters must be present in at least one member of the association.

6.11.7. An application for participation in the competition submitted by a collective participant may be rejected if, during the competition, prior to the signing of the Protocol on the results of the open competition, it becomes clear that one or more organizations have left the collective participant, and the remaining organizations, from the point of view of the Customer, are not capable of independently fulfilling the contract.

6.11.8. The Customer has the right to unilaterally terminate the Protocol on the Results an open competition or agreement if one or more organizations have left the collective participant.

IV. TYPICAL FORMS

7. STANDARD FORMS OF DOCUMENTS SUBMITTED AS PART OF THE APPLICATION FOR PARTICIPATION IN THE COMPETITION

7.1. Standard forms of documents submitted as part of the application for participation in the competition are provided in Appendix No. 3 to this competition documentation and are an integral part thereof.

JSC "Directorate of Power Plants under Construction"

TECHNICAL PART

- for the right to conclude an EPC contract for the construction of the 1st stage of the Kara-Kechin thermal power plant (TPP) with an installed capacity of 1200 MW in two stages of commissioning (stage 1 - 2x300 MW), (stage 2 - 1x600 MW) with the supply of power to the 500 kV energy system of Kyrgyzstan between the Customer - OJSC "Electric Stations" and the Winner of the competitive bidding.

To implement the projects, it is necessary to solve the following tasks:

1. Analysis and use of the pre-design and design documentation available to the Customer (hereinafter referred to as design documentation);
2. Development of working documentation for the construction of a thermal power plant with an installed capacity of 1200 MW (stage 1 - 2x300 MW), (stage 2 - 1x600 MW) in the Naryn region of the Kyrgyz Republic, taking into account the revision and updating of the design documentation;
3. Construction of the facility using the EPC contract method (engineering. Procurement. Construction) in accordance with FIDIC requirements:
 - engineering - design and survey work and obtaining all necessary permits.
 - procurement - purchase and delivery of materials and equipment for the project;
 - Construction – construction of an object with commissioning.
4. The cost of work on the construction of the 1st stage of a thermal power plant with an installed capacity of 1200 MW (1st stage - 2x300 MW), (2nd stage - 1x600 MW) in the Naryn region of the Kyrgyz Republic is subject to adjustment in the event of changes in the technical specifications or in the essential terms of the transaction.
5. All conditions of the relationship between the Customers and the Contractor are determined by the terms of individual EPC contracts signed under the terms of the International Competitive Bidding.

Item No.	List of basic data and requirements	Basic data and requirements
1	General information about the project	
1.1	Name of objects design	1. Thermal power plant (TPP): The installed capacity of the Kara-Kechinskaya TPP is $2 \times 300 + 1 \times 600 = 1200$ MW. The first stage of commissioning

		<p>operation 2x300=600 MW. Boiler with pulverized coal furnace, air-cooled steam turbine with a nominal power of 300 MW. The distance to the brown coal deposit is 35 km. Distance to the water source is 8 km. Projected brown coal deposits: Kara-keche</p>
1.2	Customer	JSC "Electric Stations"
1.3	Name of the Contractor's organization	Determined by the results of open international competitive bidding (MKT).
1.4	Location of facilities and construction sites	Kyrgyz Republic, Naryn region, Jumgal district. 8 kilometers. up from the village of Dyikan.
1.5	Basis for the implementation of the project	<ul style="list-style-type: none"> - National Development Program of the Kyrgyz Republic Republics until 2026; - National Energy Program of the Kyrgyz Republic Republics until 2035. <p>For an urgent solution energy supply to consumers in conditions of energy shortage.</p>
1.6.	Type of construction	New.
1.7	Design stage	Conducting design and survey work with the preparation of design documentation at the design and RD stage, with the receipt of all necessary permits for the construction of structures in Kara-Kechinskaya thermal power plant (TPP).
1.8	Purpose of the work	<p>Project implementation:</p> <ul style="list-style-type: none"> - construction of the 1st stage of the Kara-Kechin thermal power plant (TPP) with an installed capacity of 1200 MW in two stages of commissioning. (1st stage - 2x300 MW), (2nd stage 1x600 MW) with the output of power into the 500 kV energy system of Kyrgyzstan.
1.9	Basic requirements, defining focus of the project	1. Regulatory documents governing design and exploration activities in

	works	<p>Kyrgyz Republic.</p> <p>2. the latest standards IEC, EN, ISO, GOST, GOST R), DIN</p> <p>3. Basic provisions of FIDIC (Structures and composition of forms for EPC contracts).</p> <p>The application of construction and design standards is permitted only if agreed upon and permission is received from the Ministry.</p> <p>construction, architecture and housing and communal services of the Kyrgyz Republic.</p> <p>Approximate start-up dates for the TPP power units: (time after the EPC contract is concluded). Work will begin 1 month after the EPC contract is signed;</p> <p>Design with obtaining state expertise on the construction part and environmental expertise – 6 months.</p> <p>Completion of construction of the main building – 15.3 months.</p> <p>1Installation of the steam turbine plate - 18.3 months.</p> <p>First turbine run-up – 28.4 months.</p> <p>Connection of power unit No. 1 to the grid – 30.4 months.</p> <p>Performance of the running test by Power Unit 2 – 36.5 months.</p> <p>Completion and commissioning of the 2nd stage – 18 months.</p>
3	Analysis and use of the pre-project and design documentation available to the Customer	
3..	Composition of works	<p>1. Execute reconnaissance survey for the selection of the construction site of the Kara-Kechin TPP and its structures (consider at least 3 options),</p> <p>2. Conduct analysis earlier completed prior to design and project work:</p> <p>3. Justify the choice of sites for thermal power plant structures (location of sites, layout and composition of the main structures);</p> <p>4. Develop the basic provisions for organizing construction, V including determining the time frame and sequence for implementing the first stage construction project</p>

		<p>Kara-Kechinskaya thermal power plant (TPP) with an installed capacity of 1200 MW in two stages of commissioning. (Stage 1</p> <ul style="list-style-type: none"> - 2x300 MW), (2nd stage 1x600 MW). - design and construction with commissioning of a 1200 MW thermal power plant (stage 1 - 2x300 MW), (stage 2 1x600 MW). - construction of a 500 kV switchgear for the input and output of a 500 kV overhead power line with justification for the power distribution scheme. - provide options for fuel supply (belt conveyor, cargo cars or combined). Construction work on leveling the power plant area - Excavation work for the construction of the foundation pit for the main building - Comprehensive construction of the main building - Construction of a natural draft cooling tower - Construction of a chimney (flue) - Construction and excavation works to create the system coal transportation - Installation of the boiler - Installation of a steam turbine - Installation of a coal transportation system. - During design and construction, the use of the latest technologies and modern structures and equipment is envisaged.
4	Basic initial data transferred by the Customer before the commencement of work	
4.1.	List of documentation transferred by the Customer	<p>Pre-feasibility study of the construction project of the Karakechi thermal power plant - 2015.</p> <ul style="list-style-type: none"> - Hydrological information on the rivers Kara-keche, Zhumgal and its tributaries up to and including 2025. - Modern state energy systems Kyrgyz Republics (tariffs, consumers, location

		substations, consumed capacity, etc.) and the prospects for its development until 2020 and 2030. - Scheme national electrical networks with taking into account connecting thermal power plants to them.
4.2.	Materials obtained Contractor in the Kyrgyz Republic" from official state and authorized bodies on a paid basis	Hydrological data on river flows used for water extraction at thermal power plants - Climate data - Data on seismic conditions of construction sites - Regulatory and technical documentation, operating in construction, - Cartographic material M1:25000,
5	Basic requirements for the development of design and working documentation for the implementation of the construction project for the 1st stage of the Kara-Kechin thermal power plant (TPP) with an installed capacity of 1200 MW in two stages of input. (1st stage - 2x300 MW), (2nd stage 1x600 MW) with the output of power to the energy system of Kyrgyzstan 500 kV.	
5.1	Main technical economic indicators of Kara-Kechinskaya TPP	- Total installed capacity of the thermal power plant is 1200 MW 1st stage 2x300 MW and 2nd stage 1x600 MW - Number of hours of use of installed capacity – 6500 h/year. - Annual production – 7.8 billion kW/h at 1200 MW. - Project implementation period for stage 1 2x300 MW is 36.5 months. - Start-up at full capacity of 1200 MW – 54.5 months. - The area of the land plot for development, transferred for lease - 118 hectares
5.2.	Composition of thermal power plant structures for the development of the design documentation	The general plan of the thermal power plant and the development plan of the thermal power plant territory must be of the following composition for the development of design documentation for them: 1) Main building: - Turbine compartment. - Turbine auxiliary equipment department.

		<ul style="list-style-type: none"> - Deaerator section. - Boiler room. - Department of air heaters and conveyors. - Bunker compartment. - Smoke exhaust section <p>2) Chimney with flues Open 3) installation transformers with rolling tracks: 4) Closed (open) distribution device: 5) Distribution device for own needs: 6) Solid fuel economy: 7) Fuel oil facility with facilities: 8) Cooling (technical) water system with a circulating water supply system: 9) System</p> <p>Ash and slag removal (ASR): 10) Tank farm 11) Chemical water treatment: 12) Open herd of reagents 13) Administrative and household building 14) Checkpoint</p> <p>15) Oil farming 16) Sulfur-nitrogen purification 17) Limestone warehouse 18) Water supply and sewerage system: 19) Compressor unit.</p> <p>20) Heating points with heat energy metering units 21) Process pipeline overpasses</p> <p>22) Access control system:</p>
5.3	The composition of design works for a complex of structures and thermal power plant systems	<p>The design and estimate documentation for the construction of the Kara-Kechinskaya TPP is being developed in 3 stages: 1. Pre-design studies consisting of:</p> <ul style="list-style-type: none"> - Fundamental decision on the choice of the construction site of GRES-2 (at least 3 options). - Selection and comparison of the composition

		<p>basic equipment (at least 3 options).</p> <ul style="list-style-type: none"> - Development of fundamental technological solutions. <p>Consideration of options for selecting the main equipment.</p> <ul style="list-style-type: none"> - Calculation of the basic process flow diagram. - Development of volumetric-planning and layout solutions. <ul style="list-style-type: none"> - Preliminary planning decisions for the construction site. - Calculation of the main technological indicators of the construction project. - Highlighting stages preparatory and main construction periods, commissioning. - Economic assessment feasibility of construction based on a preliminary assessment of natural indicators. - Calculation of the electric power distribution scheme. <p>2. Conducting engineering surveys:</p> <ul style="list-style-type: none"> - Preparation and approval by the Customer of the technical specifications for conducting engineering surveys. <p>3. Development of design and estimate documentation at the stage</p> <p>Working draft:</p> <p>Preparation and approval by the Customer of the technical specifications for the execution of design and estimate documentation.</p> <p>Main technical solutions (MTS)</p> <p>Organization of the construction site</p> <ul style="list-style-type: none"> Placement of Kara-Kechinskaya TPP Power distribution scheme Placement of buildings and structures Placement of utility networks Vertical planning Transport industry Transport system arrangement. Automobile transport. External highways Improvement of the territory <p>Structural and space-planning solutions:</p>
--	--	---

		<p>General requirements for the construction of the Building</p> <p>Buildings</p> <p>Foundations</p> <p>Basic functional requirements for equipment, networks, technological solutions: Basic functional requirements</p> <p>Basic equipment</p> <p>Auxiliary equipment and materials</p> <p>Technological systems</p> <p>Electrical systems</p> <p>Auxiliary systems Automation and automated process control systems</p> <p>Heating, ventilation and air conditioning systems</p> <p>Defining the boundary design, construction and commissioning, points accessions</p> <p>compliance with current standards, schemes and fundamental space-planning solutions</p> <p>placement of the main and auxiliary equipment indicating the main and largest buildings of the power plant, complex structures and designs.</p> <ul style="list-style-type: none"> - Develop drawings for the thermal-mechanical equipment of the main building. - Perform calculations and development of structural units and types of fastening in the structures of thermal power plant systems. - Perform a predictive calculation of filtration losses in circulating water supply systems - Perform calculation of stability and stress of slopes of excavations of the main building at minus marks and junctions by generally accepted methods; - Develop fundamental solutions for fire safety systems - Develop criteria and a declaration of safety for technological structures and thermal power plant systems. - Develop a distribution scheme
--	--	---

		<p>capacity with the construction of a 500 kV outdoor switchgear with access to an existing 500 kV overhead power line</p> <p>Operation of thermal power plants.</p> <ul style="list-style-type: none"> - Develop a standard schedule for major repairs of power units. - Develop measures to organize the operation of the hydroelectric complex facilities, including a project for the hydroelectric complex utility yard. - Develop organizational structure of the thermal power plant management and its individual production facilities. Calculate the required number of thermal power plant personnel. - Develop an automated production control system (APCS) and its information, functional, organizational and technical support. - Develop the composition and number of automation tools and mechanization of labor of thermal power plant workers, including separately for execution of repair work on main equipment, buildings and structures, switchgear. - Calculate the number and professionally qualifications of thermal power plant workers, number and equipment of workplaces. - Calculate the number of personnel involved in contracting organizations to perform repair work of main equipment, buildings and structures, switchgear. <p>Develop a package of documents for implementation repair work in a businesslike manner.</p> <ul style="list-style-type: none"> - Develop sanitary and hygienic working conditions for workers (Passports). - Develop measures for occupational health and safety, including: solutions for electrical safety, protection from hazardous conditions for workers electromagnetic radiation, reduction of industrial noise

--	--	---

		<p>payback.</p> <p>Stage V Completion of the project and commencement of commercial operation of the thermal power plant according to the input scheme</p> <p>units.</p> <p>Transfer of the thermal power plant to the Customer with the elimination of all comments.</p> <p>The guaranteed service life of the station is 30 years.</p>
--	--	--

1. Main parameters of thermal-mechanical and electrical equipment for the 1st stage 2x300MW should be no worse than the parameters below

Boiler type:

Boiler with a pulverized coal furnace with natural circulation of subcritical pressure, single-chamber, with single intermediate superheating, with balanced draft, tight closing, all-steel suspended structure.

Main parameters (BMCR conditions):

- Superheated steam consumption:1025 t/hour
- Pressure of superheated steam at the outlet:17.5 MPa
- Temperature of superheated steam at the outlet:540 °C
- Reheating temperature at the outlet:540 °C
- Feed water temperature at the economizer inlet:280 °C
- Temperature of exhaust gases (smoke) (after amendments):130 °C
- Guaranteed thermal efficiency of the boiler (according to specific heat capacity):93%
- Minimum load for stable combustion of the boiler without oil (fuel) supply:30% BMCR

Note: the letter designation in the unit of pressure means: "g" is gauge pressure, "a" is absolute pressure.

Steam turbine:

Type: two-row, air-cooled, subcritical pressure condensing turbine with single intermediate superheating, single-shaft, two-cylinder (high- and medium-pressure cylinders).

Main parameters (operating mode of the TNA):

- Nominal power:..... 300 MW
- Fresh steam pressure:.....
16.67 MPa.a
- Fresh steam temperature:..... 537 °C
- Fresh steam consumption:.....723.6 t/h
- High pressure cylinder exhaust steam pressure:..... 3,386 MPa.a
- Reheat steam temperature (superheated steam):..... 537 °C
- Design back pressure:..... 4.9 kPa
- Direction of rotation (looking from the head to the generator): clockwise arrow
- Regenerative heat level: eight (3 high pressure heaters + 1 deaeration + 4 low pressure heaters)
- Turbine heat consumption:..... 7689kJ/
kW.h
- back pressure at full operation.....TRL: 11.8kRa.a

Generator:

Type: water-hydrogen-hydrogen cooling, static and self-shunting excitation.

At nominal power factor and nominal hydrogen pressure, the generator nominal power corresponds to the output power, at nominal turbine mode the continuous output

The generator power corresponds to the maximum continuous output power of the steam turbine.

Main parameters:

- Nominal volume..... 353MVA
- Nominal power..... 300 MW
- Nominal voltage..... 20 kV
- Nominal power factor....0.85
- Nominal rotation speed..... 3000 rpm
- Nominal frequency..... 50 Hz
- Cooling method..... water - hydrogen - hydrogen
- Efficiency at full load.....98.95%
- Phase..... 3
- Poles..... 2
- Method of connecting stator windings..... YY
- Number of generator output terminals..... 6
- Cooling mode..... water, hydrogen, hydrogen
- Excitation mode..... static and independent
shunt excitation

Main equipment in the heating system (for one unit)

Equipment name	Model and norm	Quantity
Electric feed pump	horizontal	3
Deaerator	Horizontal, on sliding pressure	1
Condensate pump	Vertical	2

EPC contract project
by open competitive bidding for the right to conclusion EPC - construction contract
1st stage of thermal power plant with installed capacity of 1200 MW (1st stage 2x300 MW, 2nd stage
1x600 MW) in the Naryn region of the Kyrgyz Republic with a capacity output of
Kyrgyzstan power system 500 kV

EPC - contract No.

for the right to conclude an EPC contract for construction 1st stage **Thermal power plant**
with with an installed capacity of 1200 MW (stage 1 2x300 MW, stage 2 1x600 MW) in the
Naryn region of the Kyrgyz Republic with the output of power into the 500 kV energy system
of Kyrgyzstan

Kara-Kul city "___" _____ 2025

Open Joint Stock Company "Electric Stations" (Kyrgyz Republic, country code
_____), hereinafter referred to as the "Customer", represented by General
Director Alpbek Adylovich Sadyrov, acting on the basis of the charter, on the one hand,
and _____, hereinafter referred to as the
"Contractor", represented by _____, acting on the basis of
_____, on the other hand, jointly referred to as the Parties, based on
the results of the open tender, Notice No. _____ about which was published on the
official website _____ "___" _____ 2025, on the basis of the Protocol on
the results of the tender _____, have concluded this EPC - contract as follows:

1. Subject of the EPC contract

1.1. Under this EPC Contract, the Customer instructs and the Contractor undertakes to perform the following Work: for the right to conclude an EPC Contract for the construction of the 1st stage of a thermal power plant with an installed capacity of 1200 MW (stage 1 2x300 MW, stage 2 1x600 MW) in the Naryn region of the Kyrgyz Republic. (hereinafter referred to as the "Work"), ensuring the output of power to the existing 500 kV overhead power line and the energy system of the Kyrgyz Republic, and to transfer the result of the completed Work - the Reporting Documentation (hereinafter referred to as the "Documentation") together with the facility for further operation to the Customer in the form and in the manner determined by the EPC Contract and its appendices, and the Customer undertakes to accept the result of the Work and pay for it under the terms of this EPC Contract.

1.2. Turnkey construction of the 1st stage of the thermal power plant with an installed capacity of 1200 MW (1st

stage 2x300 MW, stage 2 1x600 MW) in the Naryn region of the Kyrgyz Republic, the creation of which is the subject of this EPC contract, is developed in compliance with the requirements contained in the Technical Assignment for the performance of work: 1.2. for the construction of the 1st stage of the TPP with an installed capacity of 1200 MW (stage 1 2x300 MW, stage 2 1x600 MW) in the Naryn region of the Kyrgyz Republic (Appendix No. 1 to this Agreement), (hereinafter referred to in the text of the Agreement as the "Assignment"), the initial data, as well as in accordance with the current regulatory documentation establishing a set of norms, rules, regulations and requirements for Works of this type.

1.3. The specific list, types, volumes and content of the Works specified in clause 1.1. are defined in the Bill of Quantities (BQQ) (Appendix No. 2 to this EPC contract).

1.4. The deadlines for the execution of works, as well as each of their stages, are determined in accordance with the Work Execution Schedule (Appendix No. 3 to this EPC contract).

1.5. The ownership right to the Documentation and the constructed facility (Kara-Kechinskaya TPP) shall pass to the Customer from the moment the contractor transfers to him a complete set of Documentation for each stage of the Work and the Customer pays for the completed Work, taking into account the completion of the commercial operation of the Kara-Kechinskaya TPP.

1.6. The right to practical implementation of the Documentation, including all types of publications and advertising, after its acceptance by the Customer, shall pass from the General Contractor to the Customer. The General Contractor shall not have the right to further use or transfer the developed design documentation to third parties. The copyright to the developed design documentation shall be retained by the author of the project. The Customer shall be obliged to observe the copyright of the General Contractor in accordance with the legislation applicable to this Agreement.

2. Total contract amount

2.1. The currency of the EPC contract is US dollars. Currency code is 840.

2.2. The total amount of the EPC contract is determined by the estimated cost of the Works. The cost of the Works performed under this EPC contract is provisionally for the 1st stage 2x300 MW 934.38 million US dollars, including all taxes. For the 2nd stage 1x600 MW it is approximately 370.6 million US dollars, including all taxes.

2.3. The cost of the work is firm (fixed) throughout the entire term of the EPC contract and is not subject to any changes (including adjustments for inflation), except in cases expressly provided for by this Agreement.

2.4. In the event that the Customer changes the volumes or conditions of work not provided for in the Technical Assignment, the contract price may be clarified by written agreement of the parties.

2.5. The cost of the Works includes the costs of preparatory work, construction of a temporary camp for builders, as well as compensation for the Contractor's costs for the performance of the contractual Works, including travel expenses of the Contractor's representatives, all taxes and fees applicable in the Kyrgyz Republic, which the latter will have to bear in connection with the performance of this EPC contract, as well as remuneration to him for the Works performed.

3. Payment terms

3.1. Payment for the Works to be performed under this EPC contract shall be made by the Customer by transferring funds to the account of the General Contractor in the following order:

3.2. **Advance payment** in size 20% of the total cost of the Works specified in paragraph 2.2. of this EPC contract shall be paid by the Customer within 15 (fifteen) banking days from the date of entry into force of this EPC contract and

provision by the Contractor of a bank guarantee, as provided for in clause 3.3 of this EPC contract.

- 3.3. **Ensuring the fulfillment of obligations under this Agreement.** The obligation of the General Contractor to timely and properly perform the Works under this EPC Contract is secured by a bank guarantee of a first-class bank under the conditions set out in Appendix No. 4 to this EPC Contract, including the following conditions:

_____ ^{guarantee}; the guarantee period is until 31.12.2040; the guarantee amount is equal to the advance payment amount stipulated in clause 3.2. of this EPC contract. The General Contractor shall transfer the bank guarantee to the Customer under the terms specified in this clause no later than 15 (fifteen) banking days from the date of entry into force of this Agreement. The transfer of the Bank Guarantee shall be formalized by signing the Acceptance Certificate by authorized representatives of the parties.

- 3.4. Subsequent payments for the Works are made in stages based on the intermediate Certificates of Acceptance and Transfer of the Result of the Works (stage) performed in accordance with the Works Performance Schedule (Appendix No. 3). In this case, the advance payment is taken into account in proportion to the cost of the stage of the Works performed.
- 3.5. All payments for the work of the General Contractor specified in this section are made on the basis of invoices issued by the General Contractor. The date of payment is considered to be the date of debiting funds from the Customer's account.

4. Procedure for execution of Works and delivery and acceptance of Documentation

- 4.1. The Works must be performed in accordance with the requirements of this Agreement, the current regulatory documents of the Kyrgyz Republic and the Technical Assignment for the performance of Works on the construction of the 1st stage of the TPP with an installed capacity of 1200 MW in the Naryn region of the Kyrgyz Republic (Appendix No. 1 to this Agreement), as well as in accordance with the current regulatory documentation establishing a set of norms, rules, regulations and requirements for Works of this type.
- 4.2. The requirements for the transferred Documentation are given in clause 12 of Appendix 1 to this agreement.
- 4.3. The commencement of the work shall be no later than 3 (three) working days from the date of the advance payment by the Customer. The work shall be completed no later than the deadlines specified in the Work Schedule (Appendix No. 3). The Contractor shall have the right to complete the work ahead of schedule, of which he shall notify the Customer in advance.
- 4.4. The results of each stage of the Work in the form of relevant Documentation must be transferred to the Customer in electronic form by sending by e-mail.
- 4.5. The acceptance and transfer of the results of each stage of the Works defined by the Schedule is formalized by the Act of acceptance and transfer of the results of the completed Works (Documentation) for the relevant stage (hereinafter in this section - "Act"), signed by authorized representatives of both parties in the manner prescribed by this EPC contract. The Act signed by the Contractor must be sent to the address of the person authorized to sign contracts on behalf of the Customer.
- 4.6. If the Customer approves the received Documentation, the Customer signs the Acceptance Certificate for the result of the completed Work (Documentation) for the relevant stage. The period for approval of the completed Work (Documentation) for the relevant stage by the Customer is 15 working days.
- 4.7. In the event of a reasoned refusal by the Customer to accept the completed Work, the parties shall draw up a bilateral act with a list of the necessary modifications and the deadlines for their completion.

- 4.8. Upon completion of the entire scope of work, the Parties sign the Final Certificate of Completion of Work. On the day of signing the final Certificate of Completion of Work, the Customer is obliged to return the bank guarantee to the General Contractor. The return is formalized by the Parties signing the corresponding Acceptance Certificate.
- 4.9. The deadlines for completing the work may be changed if the Customer changes the Technical Assignment during the execution of the work, which is formalized by an Additional Agreement to this EPC contract.
- 4.10. All acceptance certificates, including intermediate Acceptance Certificates for the result of completed Work (stage), Acceptance Certificates for Documentation and the final Certificate of Completed Work must be signed on the part of the Customer by the responsible representative of the Customer or a person authorized by him under a power of attorney, on the part of the General Contractor by the first director of the company or a person authorized by him under a power of attorney, and must also be sealed with the seals of both Parties.
- 4.11. General obligations of the Parties: when performing work, when handing over and accepting the results, the Parties must be guided by the regulatory and methodological documents in force in the territory of the Kyrgyz Republic.
- 4.12. The guaranteed service life of the station is 30 years.
- 4.13. The contractor shall transfer the constructed thermal power plant with a capacity of 1200 MW without any comments; if any comments are found, the contractor shall eliminate them using his own efforts and resources.

5. Rights and obligations of the General Contractor:

- 5.1. The General Contractor shall perform the work using its own resources, in accordance with the terms of this EPC contract, the Technical Assignment for the performance of work: for the construction of the 1st stage of a thermal power plant with an installed capacity of 1200 MW (stage 1 2x300 MW, stage 2 1x600 MW) in the Naryn region of the Kyrgyz Republic, research work, design work and construction and installation work shall be carried out in compliance with the requirements of the regulatory and technical documentation specified in the Technical Assignment, as well as in compliance with the regulatory and technical documentation and regulatory and legal acts in accordance with the legislation of the Kyrgyz Republic and international standards, in compliance with all SNiPs and GOSTs in force in the territory of the Kyrgyz Republic and recognized international standards.
- 5.2. The contractor is obliged to accompany the developed project in obtaining state expertise until a positive conclusion is received.
- 5.3. The General Contractor is obliged to commence work and complete the work within the timeframes (including intermediate ones) established in the Work Schedule (Appendix No. 3 to this EPC contract).
- 5.4. The General Contractor undertakes to take into account the comments made by the Customer during the course of work and to promptly correct them in the design and in the construction and installation works.
- 5.5. Upon completion of each stage of work defined by the Work Schedule (Appendix No. 3 to this EPC contract), as well as upon completion of the entire scope of work provided for by this EPC contract, the General Contractor shall hand over the work to the Customer under the relevant Certificate of Acceptance and Transfer of Completed Work - at intermediate stages, the Final Certificate of Acceptance and Transfer of Completed Work - when the entire scope of work has been completed, with the attached accounting documents confirming the actual expenses incurred.
- 5.6. The Contractor undertakes not to transfer the Documentation to third parties and not to disclose the data contained therein without the written consent of the Customer.
- 5.7. The Contractor is obliged to fulfill in full all of its obligations stipulated in the following sections of this EPC contract.

- 5.8. The Contractor is obliged to ensure the commissioning of the 1st stage of the thermal power plant with an installed capacity of 1200 MW with all required control and supervised tests carried out and to transfer the facility to the Customer without any comments.
- 5.9. The Contractor is obliged to conduct training for the Customer's personnel in the operation of the newly constructed 1200 MW thermal power plant and, for three years, provide support with training for the technical and operational personnel of the Customer.

6. Rights and obligations of the Customer

- 6.1. Provide, if necessary, access for the Contractor's representatives to the facilities specified in the Technical Assignment, issue all relevant permits and access to archival data.
- 6.2. Within the timeframes and in the manner stipulated by this EPC contract, review and accept the developed Documentation, and if deviations from the EPC contract are discovered that worsen the result of the work, or other deficiencies in the work, immediately notify the General Contractor of this in the manner stipulated by this Agreement.
- 6.3. The Customer is obliged to pay for the work in the manner, within the timeframes and under the conditions established by this EPC contract.
- 6.4. The Customer has the right to refuse to perform the EPC contract at any time before the delivery of the results of the Work, by paying the Contractor for the work actually performed before receiving the Notice of the Customer's refusal to perform the EPC contract (in this case, damages must be paid).

7. Responsibilities of the parties

- 7.1. The General Contractor shall be liable for improper preparation of the Documentation. If deficiencies are discovered in the Documentation, the Contractor shall, at its own expense and within the timeframes agreed with the Customer, eliminate the deficiencies in the Documentation, and also compensate the Customer for any damages incurred in full on the basis of the supporting documents submitted.
- 7.2. In case of violation of the deadline for completion of the Works, as well as each of their stages, determined by the Work Schedule specified in Appendix No. 3, the Customer has the right to demand from the General Contractor payment of a penalty in the amount of 0.1% of the cost of the Works not completed on time for each day of delay, but not more than the cost of the overdue work.
- 7.3. In the event of a violation by the General Contractor of the deadlines for the performance of the Works stipulated in this EPC Contract, which entails a violation by the Customer of the deadlines for the repatriation of foreign currency funds, the expenses incurred by the Customer for the payment of penalties for this violation shall be fully reimbursed by the General Contractor within 10 (ten) banking days from the date of receipt of the Customer's written request with attached documents confirming the payment of these penalties by the Customer.
- 7.4. In the event of a breach by the Contractor of the general deadline for the performance of the Works for a period exceeding 15 (fifteen) calendar days against the deadline specified in the Schedule for the performance of the entire volume of Works, the Customer has the right to recover the amount of the advance payment not covered by the performance by submitting a demand under the bank guarantee, and also to demand payment of a fine in the amount of 5% of the cost of the Works not completed on time (the fine must be paid within 10 (ten) banking days from the date of receipt of the Customer's written demand).
- 7.5. In the cases specified in paragraphs 7.3. and 7.4., the Customer has the right to terminate the EPC contract unilaterally and out of court. In this case, the EPC contract will be considered terminated from the date of receipt of the Customer's written notice. The day of receipt of the notification is the day the Customer sends the corresponding fax message.

- 7.6. When performing work on the Customer's territory, the General Contractor shall be responsible for ensuring that its personnel comply with the requirements of labor protection standards, as well as the internal labor regulations of the Customer when performing work under this EPC contract.
- 7.7. In case of late payment against the deadline determined in accordance with clause 3 of this EPC contract, the Customer shall pay the General Contractor a penalty in the amount of 0.1% of the amount not paid on time for each day of delay, but not more than the amount of the late payment. In this case, the Contractor has the right to extend the deadlines for the performance of subsequent work for the period of delay in payment by the Customer, and is exempt from paying penalties for late payment for this period.

8. Force majeure

- 8.1. The Parties shall be released from property liability for partial or complete failure to fulfill their obligations under the contract if such failure is caused by force majeure circumstances that arose after the conclusion of this EPC contract. These include extraordinary, insurmountable circumstances beyond the control and actions of the Parties, which the Parties could neither foresee nor prevent by reasonable measures, including, but not limited to: strikes, mass riots or civil unrest, terrorist acts, wars, accidents, fires, floods, earthquakes, and other natural disasters.
- 8.2. A party has the right to refer to the circumstances mentioned in clause 8.1. only if such circumstances have directly affected the possibility of this party fulfilling the terms of the EPC contract. The party for which it has become impossible to fulfill its obligations under the EPC contract must notify the other party in writing of the occurrence and planned term of termination of the above circumstances, but no later than 5 (five) calendar days from the date of their occurrence.
- 8.3. Notification of force majeure circumstances not made within the specified period shall deprive the relevant Party of the right to subsequently refer to these circumstances as grounds exempting from liability for failure to fulfill obligations under this Agreement.
- 8.4. A written notification to the Chamber of Commerce and Industry of the relevant country shall be sufficient evidence of the effect and duration of force majeure circumstances. The latter shall be submitted to the relevant Party no later than 15 calendar days from the date of termination of the above circumstances.
- 8.5. In the event that force majeure circumstances and their consequences continue to operate for more than 30 calendar days, or when, upon the occurrence of such circumstances, it becomes clear that their consequences will operate longer than this period, the Parties shall, as soon as possible, conduct negotiations with the aim of identifying alternative methods of executing the Agreement that are acceptable to both Parties.

9. Dispute resolution procedure

- 9.1. The Parties shall take all measures to resolve disputes and disagreements that may arise during the performance of this EPC Contract through negotiations.
- 9.2. The Parties shall establish a mandatory claims procedure for resolving disputes and disagreements, and any claim under the EPC contract must be made in writing and considered by the receiving Party within 10 (ten) calendar days from the date of its receipt.
- 9.3. Relations between the parties not specified in this EPC contract shall be governed by the current legislation of the Kyrgyz Republic.
- 9.4. In the event that the Parties fail to reach a mutually acceptable solution, all disputes, disagreements or claims arising out of or in connection with this EPC Contract shall be

with him, are subject to resolution in the Interdistrict Court for Economic Cases of Bishkek.

10. Confidentiality

- 10.1. The Parties have agreed that the provisions of this Agreement, as well as all information and data of a technical, technological, organizational, legal, financial and commercial nature, materials and documentation provided by each of the Parties in connection with the execution of this Agreement, are confidential information. In this case, the term "confidential information" in the EPC contract means both documented and undocumented information.
- 10.2. Each party undertakes to maintain confidentiality of information received during the execution by the parties of this D EPC.
 - contract, and agree on all issues regarding the legal protection of confidential secrets. In the event of disclosure of confidential information by one party, the guilty party is obliged to compensate the other party in full for the losses incurred in connection with the disclosure or unauthorized use of this information.
- 10.3. Providing documents and information to government agencies and local government bodies at their legal request does not constitute disclosure of confidential information.
- 10.4. The obligations of the parties to maintain confidentiality shall remain in force after the termination of this Agreement for ten years and shall extend to the successors of the parties.

11. Duration of the EPC contract

- 11.1. This EPC contract shall enter into force from the day from the moment of signing this Agreement until the parties have fully fulfilled their obligations under the EPC contract.
- 11.2. Unilateral termination is not permitted, except in cases provided for by the legislation of the Kyrgyz Republic and this EPC contract.

12. Additional terms

- 12.1. Any notice, claim or other communication given by the notifying party personally, by fax or by electronic mail shall be deemed to have been received on the date of its transmission. Receipt of such notice, claim or communication shall be confirmed in writing in the same manner in which it was transmitted. If the date or the last day of the period for performance of any obligation under this EPC Contract is a non-working day, the date or the last day of the period for performance of the relevant obligation shall be transferred to the first working day following the day or date of performance provided for in this EPC Contract.
- 12.2. All amendments and additions to this EPC contract shall come into force only if they are executed in writing and duly signed by competent persons authorized by the parties.
- 12.3. If the parties fail to reach an agreement regarding amendments to this Agreement, the parties have the right to refer the dispute to court for consideration.
- 12.4. Neither party may transfer or assign its rights and obligations under this EPC Contract without the written consent of the other party.
- 12.5. All appendices, protocols and other documents attached to this Agreement shall be an integral part thereof.
- 12.6. All documents to this EPC contract sent by fax or e-mail have legal force if, no later than 3 working days following the day of sending the fax or e-mail, the sending of the original is confirmed by an express mail receipt.

Originals must be provided within 10 (ten) calendar days.

- 12.7. The parties are obliged to notify each other of changes in the details within three days from the date of their change. In case of failure to fulfill this obligation, the party that did not notify has no right to make claims against the other party that arose due to the lack of awareness of that party.
- 12.8. This EPC contract is drawn up in Russian in 2 copies, one for each party, having equal legal force.
- 12.9 If individual provisions of this EPC - _____ the contract will be invalid or lose their force, all other provisions shall continue to apply.
- 12.10. The Parties by mutual agreement declare and guarantee the following:
- that the person signing below is the authorized _____ is representative of this Party,
 - that all necessary approvals and permits from governing bodies established by the constituent documents of the Parties have been obtained,
 - all requirements of the legislation of the Parties and the constituent documents of the Parties, including charters, have been met,
 - that this EPC Contract is a valid and binding obligation of that Party, mandatory for performance in accordance with the terms of this EPC Contract.
- 12.11. List of risks identified during the preparation of the EPC contract that are not acceptable to the Customer for continuing further cooperation under the EPC contract:
- Inadequate and incomplete design;
 - Incomplete knowledge of local conditions;
 - Incorrect choice of equipment, materials and construction technologies;
 - Constant change of the project content;
 - Uncertainty in the overall cost estimate due to uncertain quantities and prices for unit of production during planning.
 - Low level of management competence (especially subcontractors),
 - Low level of documented project detail
- 12.12. All correspondence related to the execution of this EPC contract will be conducted in Russian.
- 12.13. All appendices are an integral part of this EPC contract (attached to the tender documentation).

APPENDIX No. 3
to the Competition
documentation

STANDARD FORMS OF DOCUMENTS

submitted as part of an application for participation in an open tender for the right to conclude an EPC contract for construction^{1st stage} Thermal power plant with with an installed capacity of 1200 MW (stage 1 2x300 MW, stage 2 1x600 MW) in the Naryn region of the Kyrgyz Republic Samples of the main forms of documents,

included in the application for participation in the competition

1.1 Letter of Offer (Form 1)

1.1.1 Offer Submission Letter Form

beginning of form

No. _____ «__» _____ 2025_

Dear Sirs!

Having studied the notice of the competition [the type and full name are indicated name of the competition], posted in [the date of publication of the Notice and the publication in which it was published are indicated], and the tender documentation, and accepting the requirements and conditions of the tender established therein, including the established claim procedure for appeal, _____ ,

(full name of the Competition Participant with indication of the organizational and legal form)

registered at: _____ ,

(legal address of the Competition Participant)

offers to conclude a contract for the performance of the following works:

(subject of the agreement)

on the terms and in accordance with the commercial and technical proposals, which are integral appendices to this letter and which, together with this letter, constitute an application for participation in the competition, for a total amount of:

List all lots in the order of their occurrence, for which an offer is submitted

Lot 1: [name and lot number] Total cost of the offer excluding taxes, USD (1 USD =¹ US dollar).

(final cost, USD (1 USD = 1 US dollar))

in addition VAT, USD(1 USD = 1 US dollar)

(VAT on the final cost, USD (1 USD = 1 dollar)
USA))

total with VAT, USD (1 USD equals 1 US dollar).

(VAT on the final cost, USD (1 USD = 1 dollar)
USA))

This application for participation in the competition has the legal status of an offer and is valid until “__” _____ 2025c_.

This application for participation in the competition is accompanied by *[the quantity is indicated]* alternative proposals (options offered by us at your choice) on individual technical aspects (elements) of the application for participation in the competition, as well as *[the quantity is indicated]* alternative proposals on individual legal aspects (elements) of the application for participation in the competition - contractual terms. In this case:

- alternative proposal #1, the essence of which is set out in paragraph ccss on pages __ of the application for participation in the competition (increases/decreases -

end of form

specify what is needed) the final bid price for the main offer on [*the amount is indicated in figures and words*]USD (1 USD = 1 US dollar);

- alternative proposal #2, the essence of which is set out in paragraph ____ on pages ____ of the application for participation in the competition (increases/decreases - *specify what is needed*) the final bid price for the main offer on [*the amount is indicated in figures and words*]USD (1 USD = 1 US dollar);
- . . . etc.»

This application for participation in the competition is supplemented by the following documents, including the essential appendices:

1. Technical proposal for execution of works (form 2) - for ____ p.m.;
2. Minutes of disagreement to the draft EPC contract (form 3) - on p.;
3. Work schedule (form 4) - for ____ years;
4. Summary table of cost of works (form 5) - on ____ l.;
5. Schedule of payment for work performed (form 6) - on ____ l.;
6. Application form of the Competition Participant (form 7) - ____ l.;
7. Certificate on the list and annual volumes of execution of similar contracts (form 8) - on ____ p.;
8. Plan for the distribution of work volumes between the general contractor and subcontractors (form 9) - for ____ l.;
9. Plan for the distribution of volumes of work performed/performance of work within a collective participant (form 10) - on ____ p.
10. Certificate of participation in legal proceedings (form 11) - for ____ years;
11. Information letter about the existence of connections of the Competition Participant that are of an affiliation nature with the employees of the Customer or Competition Organizer (form 12) - to ____ p.;
12. List of documents contained in the application for participation in the competition (form 15) - on l.

(signature, M.P.)

- 1.1.2 Instructions for filling
- 1.1.2.1 The letter must be drawn up on the official letterhead of the Competition Participant. The competition participant assigns a date and number to the letter in accordance with the document flow rules adopted by the participant.
- 1.1.2.2 The participant of the competition must indicate his full name (indicating organizational and legal form) and legal address.
- 1.1.2.3 The participant of the competition must indicate the cost of the work to be performed in words, USD (1 USD = 1 US dollar), separately excluding VAT, the amount of VAT and together with VAT in accordance with the Summary Cost Table (column "TOTAL"). The price should be indicated in the format XXX XXX XXX,XX USD (1 USD = 1 dollar USA),.
- 1.1.2.4 The participant of the competition must indicate the validity period of the application for participation in the competition. according to requirements.
- 1.1.2.5 The participant of the competition must list and indicate the volume of each of documents attached to the letter of submission of the offer, defining the essence of the technical and commercial proposal of the Participant of the competition.
- 1.1.2.6 The letter must be signed and sealed in accordance with requirements.

1.2 Technical proposal for execution of works (form 2)

[filled out separately for each lot, indicating the number and name of the lot]

1.2.1 Form of Technical Proposal for the performance of works

beginning of form

Appendix No. 1 to the letter of submission of the offer from " "

year No.

Technical proposal for execution of works

Name and address of the Competition Participant: _____

[Here the Participant of the Competition in free form provides his technical proposal, based on the draft Technical Assignment for the performance of work in accordance with the requirements of Section II of the Technical Part of the Competition Documentation].

(signature, M.P.)

(last name, first name, patronymic of the signatory, position)

end of form

1.2.2 Instructions for filling

1.2.2.1 The tender participant provides the number and date of the letter of submission of the offer, to which this technical proposal is an appendix.

1.2.2.2 The participant of the competition indicates his trade name (incl. organizational and legal form) and your address.

1.2.2.3 The technical proposal is completed separately for each of the lots indicating the number and name of the lot.

1.2.2.4 The technical proposal describes all items of the commercial offers.

1.2.2.5 The technical proposal will serve as the basis for the preparation of an annex to EPC contract. In this regard, in order to reduce the overall costs of effort and time of the Customer and the Tender Participant in preparing the Contract, this proposal should be prepared in such a way that it can be included in the Contract with minimal changes.

1.3 Protocol of disagreements to the draft EPC contract (form 3)

1.3.1 Form of the Protocol of Disagreements to the Draft Agreement

beginning of form

3.				

(signature, M.P.)

(last name, first name, patronymic of the signatory, position)

end of form

- 1.3.2 Instructions for filling out the Protocol of Disagreements to the draft EPC contract
- 1.3.2.1 The tender participant shall provide the number and date of the letter of submission of the offer, to which this technical proposal is an appendix.
- 1.3.2.2 The participant of the competition indicates his/her company name (incl. organizational and legal form) and your address.
- 1.3.2.3 This form is filled out as if the Participant of the competition had requirements or proposals for changing the draft EPC contract, and in the absence of such requirements or proposals; in the latter case, the tables contain the words "We agree with the proposed draft EPC contract".
- 1.3.2.4 If the Participant of the Competition has proposals for making changes to the draft EPC contract, the Tenderer must submit this protocol of disagreements as part of its application for participation in the tender. In the prepared protocol of disagreements, the Tenderer must clearly distinguish between the mandatory and desirable conditions of the EPC contract. "Mandatory" here are proposals and conditions, in case of non-acceptance of which the Tenderer will refuse to sign the EPC contract. "Desirable" here are proposals on the terms of the EPC contract, which the Tenderer submits for consideration to the Tender Organizer, but the rejection of which by the Tender Organizer will not entail the Tenderer's refusal to sign the EPC contract if it is recognized as the Tender Winner.
- 1.3.2.5 The Customer reserves the right to review and accept before signing EPC contract proposals and additional (not fundamental) amendments to the EPC contract. If the parties fail to reach an agreement on these amendments, the parties will be obliged to sign the Contract on the terms and conditions set out in this Tender Documentation and the Tender Application of the Tender Winner.
- 1.3.2.6 In any case, the Competition Participant must keep in mind that:
- A) if any of the mandatory Contractual Proposals and conditions put forward by the Participant are unacceptable to the Competition Organizer, such application for participation in the Competition will be rejected regardless of the content of the technical and commercial proposals;
 - b) in any case, the provision by the Participant of the competition of a protocol of disagreements on the initial draft of the Agreement prepared by the Customer does not deprive the Participant of the competition and the Customer of the right to discuss these conditions and change them in the process of pre-contractual negotiations in order to reach an agreement regarding the change of these conditions.

1.4 Work schedule (form 4)

1.4.1 Form of the calendar plan for the execution of works

beginning of form

Appendix No. 3 to the letter on the submission of an
offer dated "___" _____ year No. _____

Work schedule

Name and address of the Competition Participant:

_____ Start of work: "___" _____ 20__

Completion of work: "___" _____ 20__

No. p/p	Name stages	Execution schedule, in weeks from the date of signing the EPC contract								
		1 week	2week	Week 3	4week	5week	6 week	7week	Week 8	etc.
1	2	3	4	5	6	7	8	9	10	11
1.

(last name, first name, patronymic of the signatory, position)

end of form

1.4.2 Instructions for filling

1.4.2.1 The participant of the competition provides the number and date of the letter of submission **offers,**
an appendix to which is this calendar plan for the execution of works.

1.4.2.2 The participant of the competition indicates his/her company name **(incl.**
organizational and legal form) and your address.

1.4.2.3 This Work Schedule contains the volume, estimated
deadlines for the performance of all types of work and services under the Agreement.

1.4.2.4 To indicate the timeframes, against each stage/substage, any
sign or darken the corresponding number of columns, for example:

No. p/p	Name stages	Execution schedule, in weeks from the date of signing the EPC contract								
		1 week	2week	Week 3	Week 4	5week	6 week	7 week	Week 8	etc.
1	2	3	4	5	6	7	8	9	10	11
1.	Work 1									
2.	Work 1.1									
3.	Delivery 1.2									
4.	Work 1.3									
5.										

1.4.2.5 The work schedule can also be prepared with
using project management software (such as Microsoft Project, etc.).

1.4.2.6 The work schedule will serve as the basis for preparation
appendices to the EPC contract. In this regard, in order to reduce the overall
costs of effort and time of the Customer and the Tender Participant in
preparing the EPC contract, this Work Schedule should be prepared in such a
way that it can be included in the EPC contract with minimal changes.

offer dated “__” _____ year No. _____

Summary table of work costs

Name and address of the Competition Participant: _____ In prices at
the time of submitting an application for participation in the competition: “__” _____ 20__

Item No.	Type of work	Unit of measurement	Qty	Single price, USD (1 USD = 1 dollar USA) (without VAT)	General cost, USD (1 USD = 1 US dollar) (without VAT)	Notes
1	2	3	4	5	6	7
TOTAL without VAT, USD (1 USD = 1 dollar USA)				X		
VAT, USD (1 cu = 1 US dollar)				X		
TOTAL with VAT, USD (1 USD = 1 dollar USA)				X		

The cost of work is calculated on the basis of an estimate.

(signature, M.P.)

(last name, first name, patronymic of the signatory, position)

end of form

1.5.3 Instructions for filling

- 1.5.3.1 The tender participant provides the number and date of the letter of submission of the offer,
an appendix to which is this summary table of work costs.
- 1.5.3.2 The participant of the competition indicates his/her company name (incl. organizational and legal form) and your address.
- 1.5.3.3 The participant of the competition indicates the date on which he expected the Summary table of work costs.
- 1.5.3.4 The Summary Table of Cost of Works shall provide the name of the work, respectively: the work to be performed, the unit of measurement of the volume of work, the volume of work in the specified units of measurement, the unit price, and the total cost of the work obtained by multiplying the volume of work by the unit price. Notes and comments may also be provided.
- 1.5.3.5 The summary table of work costs will serve as the basis for the preparation annexes to the Agreement. In this regard, in order to reduce the overall effort and time spent by the Customer and the Tender Participant on preparing the Agreement, this Summary Table of the Cost of Work should be prepared in such a way that it can be included in the Agreement in the form of an estimate with minimal changes. In this case, the Summary Table of the Cost of Work should fully correspond to the estimate presented in the technical assignment.
- 1.5.3.6 Appendix No. 1 to the Summary Table of Cost of Works must be filled in Excel format and provide it as part of the application (in an electronic copy).
